ed owing to the nature of the sandy soil which continually threatens to cave in on the workers. To combat this a tremendous amount of heavy timber has been used to build up the sides of the excavation. Another difficulty which has to be contended with is the continual influx of water from the river. There has been much criticism of the fact that Sunday work has been induged in, but it has proved practically impossible to eliminate this owing to the water, which has to be watched and worked

'Saved - - -

In June, 1910, a prominent New Brunswick lumber merchant was granted an Imperial policy for \$2,500.00.

His fourth annual premium was due June 15th, 1913. He didn't pay it-and it wasn't paid on August 26th, when he died.

But the Company continued the insurance in force under its Automatic Non-Forfeiture provision, and paid the proceeds of the policy to the assured's four young children on September 27th, 1913.

Now think what would have happened had the policy not contained this saving clause, which is common to all Imperial policies.

MORAL: Insure in the Imperial, the Company that really safeguards its policyholders' interests.
