MONDAY MORNING

#### West Dome Compressor Begins Operations

Two Air Drills at Work in Shaft-Ore From 250 Foot Level.

.. PORCUPINE CITY, April 27 .- (From Our Man Up North.)-Additional machinery for the West Dome Mines arrived turned on at the new plant of the Doble here to-day from Kelso, after a hurried Mines, where a four-drill compressor trip by express from Toronto, and six plant was put into operation this mornteams are trying to drag the weight thru | ing for the first time. Twenty-five men the mud and water around Porcupine Lake to the mines. Two more teams were engaged at this place.

The outfit is composed of a 25-horse power boiler, two shot drills, a hoist and a steam pump. On the property are two 60-horse-power boilers, two 20-horse-power boilers, steam pumps, hoists and a

er boilers, steam pumps, hoists and a six-drill compressor plant.

Five days were required to reach Porcupine, where the swamp to the west is practically impassable for man or beast. The six-drill compressor plant on the property was started to-day, two air drills were operated in shaft and surface prospecting. Thus, the West Dome is the first in that section to turn on steam. With the two air drills working in the shaft and drifts and six core-drills tearing into the earth from the surface, and a reserve of four more air drills that can be let loose if necessary, the public from a mining standpoint will find it of interest to watch the work at the West Dome.

Aitho there is nothing being given out

Dome.

Altho there is nothing being given out at the mine, it is known positively that the points of the drills are bringing up ore from the depth of 250 feet, and that the ore body was encountered at the 120-foot depth when the sulphides appeared in the veln.

Another feature, which is given vast attention by the management is the fact

Another feature which is given vast attention by the management is the fact that, here like other mines in the camp, the schist carries such high values that the massive body along the velus will pay to mine out. The schist carrying high values in the formation at the West Dome corresponds with what was found to be true at the Dome and the Dome extensions, where the vein formation is lacking in hardness, a condition that must not be understood as existing all over Porcupine, for formations vary in this section from that which exists in some other parts.

Some other parts.

At present 60 men are employed. In addition to the shot and diamond core drilling, a shaft is being sunk to the 20-foot level, with over 60 feet of the depth

## Diamond Drilling to Prove up the Property

Work on Warner-Leighton Claims Will Show Up New Section.

PORCUPINE CITY. April 27.—(From Our Man Up North.)—Diamond drilling on a quartz deposit on the Warner-Leighton property along the railway line at the Poscupine Centre townsite is pro-pressing slowly. The quartz appears in banded scist, and the formation is ex-tremely hard on the surface. Engineer Warner figures that with 40 feet of Jepth shell will have been passed and the softer grade of rock encountered.

Great interest is attached to the diamond drilling in this quarter for with 200 feet or more of depth, a better line will be had on the formation in a quarter that

The ridge, in which the quartz deposit appears, runs nearly east and west and encounters the Foley-O'Brien ridge a half mile to the west. Chas. Fox.

#### IMMENSE QUARTZ DYKE.

Excellent Gold Values in Trenching on Eldorado Property.

PORCUPINE, April 28 .- (Special.)-Con. siderable interest was manifested this week in Eldorado Porcupine Mines, over 100,000 shares of the stock having been sold here. Harry Buch, M.E., is ost enthusiastic as to its prospects. The most enthusiastic as to its prospects. In Eddorado Company own three claims in Whitney Township, and have an immense quartz porphyry dyke, 300 feet wide, running across their properties, on which 5000 feet of trenching has been done. The dyke carries good values in gold.

#### Two Shafts Going Down To the 200 Foot Level

Steam Turned on at New Plant of Dobie Mines in Northern Tisdale.

PORCUPINE CITY, April 7.-(From Our Man Up North.)-Steam has been

arc at work sinking two shafts to the 20-foot depth.

The Dobie Mines were organized 30 days ago and comprise three lots formerly held by the Tisdale Mining Company. The holdings are the two lots where the boiler and compressor plant art located, just west of the Scottish-Ontario. It is on two of these claims, the group east of the Crown Chartered that the 20-foot vein carrying spectacular showings runs. A shaft is down here 100 feet and levels are being cut.

No surface prospecting is now under feet and levels are being cut.

No surface prospecting is now under way on any of the properties, and it will be two weeks yet before active operations along this line will be taken up. Last winter the eight Armstrong-Booth claims were prospected merely to get a line on the quartz deposits, after the Armstrong-McGibbon interests took over an option.

# HYDRO-ELECTRIC POWER FOR PORCUPINE CAMP

Sandy Falls Company Have Right of Way Cut Thru From Mattagami.

PORCUPINE CITY, April 27 .- (From Our Man Up North.)-Power from the Sendy Falls Company on the Mattagami River will be available not later than

The right-of-way for the pole line has

been cut to South Porcupine at the ex-treme east end of the Lakeview Townsite, and soon the poles will be up the entire distance. Transformers are to be placed at the Hollinger Mine.

Current to the amount of 2000 horse power will be generated this summer. Should the demand for more power come, only a little more expense and work will be required to furnish another thousand horse power. And, it is figured that 300 horse power will suffice for the Porcupine industries for some time to come. Outside of the Hollinger and the Dome Mines, there are no companies prepared

Mines, there are no companies prepared to use electricity this summer in development work. Current will be supplied to the townsites and to private consumers all along the route from the Mattagami Klyer to Golden City.

CROWN RESERVE IN BADGER.

The Badger Mine, at Cobalt, is one of the properties worth considering as a revival in Cobalts arises. The Crown Re-serve people own a large block of stock in the Badger, which has got into good ore. News has reached the city that the

# DESPERATE CONDITION

It is Feared Many of Garrison of 30,000 Will Prove Disloyal If Rebels Win.

HONGKONG, April 30 .- Ail advices reaching here from Canton indicate a desperate condition of affairs in that city. There are 30,000 soldiers within the walls, and there is great fear that many of these would prove disloyal if it appeared that the rebels were about to gain the upper hand. The rebels are strong in numbers, struction with fanatical bravery. They made an attack upon the provincial arsenal, but were repulsed by the troops under loyal officers. Many of the revolutionists were killed, while some of them fled to an unoccupied rice store and built a barricade with hundreds of bags of rice. The troops found great difficulty in assaulting the barricade ,owing to bombs, which the rebels threw with great accuracy Finally the store was set or fire, while the troops remained at some distance to pick off those who might seek to escape the flames. Thirty or more of the rebels were burned to death, while others committed suicide with their revolvers rather than be taken There has been a gathering at Canton lately of those opposed to the Manchu dynasty. A few days ago sev eral hundred arrived from Hongkong The plot to overturn the government was betrayed and the leaders of the movement urged the viceroy's guard to join forces and kill the Manchus. This the bodyguard refused to do, with the result that when the at tack was made upon the official residence of the viceroy a few days ago the revolutionists were routed. which may be depended on not to abandon the rulers to their fate, and all attempts by rebels to induce them

There are certain bodies of troops to join in the movement have been futile. But the rebels, working together well-devised plan, have succeeded in doing much damage to property in addition to killing some of the officlais. The family of the viceroy is nov living on a gunboat.

Wu Sum, a Chinese, who was edd cated in Japan, and wears European clothes, is the leader of the movement. Both he and his confederates cam 1.69, 50 at 169, 200 at 1.70, 400 at 1.70, 400 to Canton from Singapore. While the authorities have not been able to cap ture these, a number of suspects have been arrested and promptly put to death. It is feared, however, that some of these were entirely innocent. The American gunboat Wilmington is now at Shamien, the foreign concession, which is on the point above the

# WORK OF CANADIAN INSTITUTE

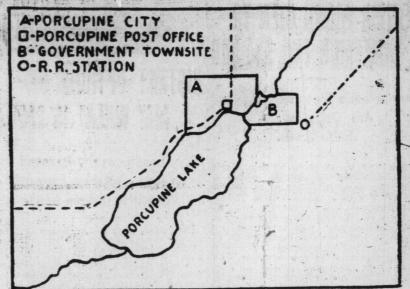

An interesting lecture was delivered on Saturday evening at the Canadian Institute by James Loudon, LL.D., on The Objects of the Canadian Insti-Stute and its Relation to the University

Mr. Loudon referred back to the actions of the Canadian Institute."

al was Sir Sandford Fleming, who pub- eleven years of age. lished his magnificent account of the Toronto harbor and its mode of formation, and who first issued the ac-

permanent business and residental centre. Situated on the north shore of Porcupine Lake, on high land, gently sloping to the lake and Porcupine River, it has everything in its favor that nature can contribute, supplemented by the immeasurable advantages of rall-road and postal facilities. In view of the extensive mining operations planned for Northern Whitney and Tisdale for the coming summer, the probabilities for a substantial growth in Porcupine City are excellent. Town lot investors, as well as those planning a business and residence in the district, will do well to see or write

Chas. C. MacGregor, King St., Porcupine City

# Eldorado Selling Well

The demand for the Eldorado Porcupine Mines stock at 10 cents per share is stronger in Porcupine than any other part of the country. Over fifty thousand shares have already been sold in the Golden City, which stamps the stock as one pf merit. We employed one of the best engineers to report on the company's property of 120 acres, and the report gives us greater confidence than ever in recommending the purchase of the stock.

Eldorado is capitalized at the modest sum of \$500,000. Compare this with other flotations. The total offering at 10 cents was only 200,000 shares, and this has already been largely subscribed. No stock will be offered after that at less than 25 cents per share, and we believe that the money received from the first issue will make it worth much more than that If you consult your best interests your order for Eldorado should reach us by the first mall.

#### PORCUPINE THE GOLDEN CITY Station of the T. & N. O. R.R.

The Town of Porcupine is located on Porcupine Lake, in the heart of the greatest gold field ever discovered. Stages and motor boats clear in every direction to the various mines "Bobs Lake," a mile distant, the source of water supply, now being installed for the town, has been carefully analyzed, and is the only body of water in the vicinity that is adapted for drinking and cooking

purposes.

It is worth your time to think about it as a business proposition, but act quickly before the choice sites are selected. Every mile of advance of the railroad adds dollars to the value of the sites now offered for sale.

Choice Hotel Sites on the Lake Front, ideal locations, convenient for business men or tourists, the chance of a lifetime for wide-awake business men and manufacturers, but the selection of these sites must be made at once. Remember there are over three hundred buildings already. The fact that the government has recognized the importance of the camp to construct a railroad, as assurance of its permanency. Choice lots for residences are offered in the different sections of the town.

Local maps or charts of the town will be sent if requested, and selections will be held for a limited time on receipt of deposit, and lots will be sold in easy payments.

Write at once, address and make money orders, cheques, payable to

SUNDAY SCHOOL ANNIVERSARY

Special Services Were Held Yesterday at Bathurst-street Methodist.

Bathurst-st. Methodist Church was quite inadequate for the large congregations attending the Sunday school anniversary services yesterday. At the morning and afternoon services the Sunday school children occupied a young at the morning service on the the direction of Samuel Woodland. A festival of song was held in the

afternoon, with a reading by Mrs A sermon to the parents and Sunday school teachers on the necessity of teaching religious truths to children in their early years, was preached at night by Rev. Hugh Locke of East Poronto.

C. P. R. Improving Equipment. MONTREAL, April 30 .- (Special.) contending that increased efficiency i the running of their trains can only be obtained by perfecting their equip ment, the C.P.R. have now under com sideration a new device which will re duce the amount of work in conne in the near future on the new freight operation for nearly two months, and president, Frank Arnoldi, K.C.; liinformation may be obtained at yards and freight sheds which the the general results have been so satbrarian, Prof. McCallum; secertary. Grand Trunk city ticket office, northcompany will erect in that section of isfactory that it is probable that in John Patterson, treasurer, Wm. Scott; west corner King and Yonge-streets. the city. The yards and sheds will the near future the other engines
