CHEESE MARKETS The National Mines, Ltd., is tearing down the old cencentration plant at the King Edward and installing a flotation plant. It is intended to dredge the tails from the old plant out of the lake and re-treat them, as extraction by the old plant was very low and the tails are expected to run high enough to admit of a good profit per ton. Later if the results are as good as anticipated it is possible that some of the dump ore may be taken. LONDON, Ont., July 22.—Twelve factories offered 1609 boxes; no sales; bidding from 15c to 1614c.

ST. HYACINTHE, Que., July 22.—At the regular meeting of the cheese board here, 100 packages butter sold at 29c; 500 boxes cheese offered; all sold at 1614c. cowansville. Que., July 22.—At the meeting of the Eastern Dairymen's Exchange nine factories offered 545 packages of butter. Two factories sold at 25%c and seven at 25%c.

The Dominion Reduction Company, it is understood, will install an oil flotation plant in the present mill near Peterson Lake. The company will try out oil flotation in an experimental way at first and if it is found to be satisfactory and to give better results than the cyanide process the tanks, will be taken out and replaced with oil flotation cells. The first oil flotation mill to be put in operation in the camp was at the McKinley-Dairagh, where splendid results are being obtained. The big 800-ton plant at the Buffalo mill, will, it is expected, be ready within a short time now. The four tube mills were installe dakout a month ago. The latter mill will treat about 500 tons of tailings per day, in addition to 100 tons of mill rock. BELLEVILLE, July 22.—At the regular meeting of the Belleville Cheese Board 2720 boxes of white were offered. All sold at 15%c.

VANKLEEK HILL, July 22.—There were 1201 boxes white and 381 boxes colored cheese boarded and sold at the regular meeting of the Vankleek Hill cheese board. All sold at 16 7-16c. Five buyers were present.

CHICAGO. July 22.—Radical up-turns in wheat values took place today, chiefly as a result of black rust spread-ing thruout the Dakotas and Minneing thruout the Dakotas and Minnesota, and also anto Manitoba. The
close was strong, 3 3-8c to 3 7-8c net

It was a runaway market in whast right from the outset. Black rust and blight reports were so numerous and seemed to show such extensive damage that buyers formed an overwhelming majority in the pit, and there was at no time any bearish reaction of importance. Vague possibilities of peace were completely lost sight of and attention was centred wholly on the domestic and Canadian spring crop, the success or failure of which would be settled in the main within the next three weeks, Many buils put especial amphasis on the colinion of a leading authority that no improvement in black rust conditions could be expected from now on, as the pest was shutting off to a hopeless extent the nourishment that ought to come from the scil.

Reports from Manitoba.

Specific reports of black rust in Manitoba had much to do with lifting the wheat market to the highest point of the day and the week. Despatches from Morris, Manitoba, said black rust of the day and the week. Despatches from Morris, Manitoba, said black rust of the day and the week. Dry, hot weather sent corn up, and much of the gain was held despite heavy profit-taking. Oats derived strength from the action of other cereals, and fear of daming to the northwestern crop.

Provisions averaged higher, with grain, and seemed to be unaffected by weakness in the hog market.

BROCKVILLE, Ont., July 22.—
Frank Pereira of Ottawa, a summer visitor to the Thousand Islands, made a remarkable swim in the river the other day, between the nine and five mile lighthouse, a distance of nearly five miles. He made it in 1 hour, 45 minutes. It is no trick for him to swim across the river.
