

"MAN'S BEST FRIEND"—EVEN TO THE HUNS

The German Red Cross dog finds a wounded soldier after a battle.

MORNING WAR SUMMARY

Washington, Sept. 10.—President Wilson's request for the recall of the Austrian ambassador Dr. Constantine Theodor Dumba, has broadened into a situation involving Captain Frans Von Papen, the military attaché of the German embassy; Alexander Nuber Von Perked, the Austrian consul general in New York, and possibly Count Von Bernstorff, the German ambassador. The official view is that the ambassador, although technically involved, is not so seriously concerned as the military attaché, or the consul general. It is unlikely that both of the latter may be recalled, or dismissed from the country.

Coupled with Germany's disappointing and unsatisfactory explanation of the sinking of the White Star liner *Arabic*, after Count Von Bernstorff had given assurances that full satisfaction would be given, if it was established that a German submarine sank the ship, official Washington views the friendly relations with the German powers strained more toward the breaking point than ever before.

Petrograd, Sept. 10, via London.—The concentration of heavy Austrian forces on the Romanian frontier points to serious operations in the near future against Bessarabia and the region of the Middle Danube, in the opinion of Russian war office officials. It is reported that the concentration indicates that an offensive move against Romania is in prospect.

The officials declare, however, that it is premature to regard the Kiev-Dniester line as endangered.

An advance from Galicia is regarded as unlikely at present, because of the recent Teutonic defeat in Tarnopol. In any event the invaders would have to move slowly, breaking down opposition at every river and on every elevation. London, Sept. 10.—The answer of the people of London, and in the London district, to these exercises in frightfulness may be given in an episode mentioned in the *Manchester Guardian*, says the *Spectator*, in commenting on the Zappala raids of Tuesday and Wednesday nights. "A recording sergeant has been addressing crowds from a platform made from debris of ruined houses, and the results have been excellent."

Hostile reinforcements took part in the fighting, which was violent throughout. East of the mouth of the Sereth, and on the Bessarbian frontier, calm prevails."

"The Austro-Hungarian forces in Lithuania have crossed the broad, swampy region of the Jasiolda and Orla and have advanced in the region south-east of Rosany."

IN THE CLUTCHES OF RHEUMATISM

The Great Suffering of a Calgary Lady before Relief Was Found

There is still a very prevalent belief that rheumatism is due to cold or wet weather. This belief is probably due to the fact that when the blood is thin and watery there is an acute sensitivity to atmospheric conditions and a change to wet weather often means a return to the excruciating pains. Rheumatism, however, is rooted in the blood, and it can only be driven from the system by building up and enriching the blood. Hot baths and outward applications of liniment may give temporary relief, but cannot cure. If the disease is not attacked through the blood, it simply fastens itself more firmly on the system, and the sufferer ultimately becomes hopelessly crippled. The truth of this is proved by the case of Mrs. Frank Ford, of Calgary, Alta. Mrs. Ford says: "I was an almost helpless cripple from rheumatism. My arms and hands had to be bandaged. My ankles were so swollen that I had to use crutches. After doctoring for a long time and growing steadily worse, the doctor advised me to go to Banff Springs. I stayed there for eight weeks taking daily baths and returned home poorer in pocket by about \$150 and not one bit improved in health. I then entered a local hospital, but did not derive any benefit. I was in such constant pain that I almost wished to die, and I felt sure I would be a life-long cripple. It was at this stage that a friend who had been greatly benefited by Dr. Williams' Pink Pills urged me to try them. I began the use of the Pills and after taking them a few weeks the swelling in the joints began to go down and the pain was relieved. This greatly encouraged me and I continued the treatment until in the course of three months the cure was complete. I had thrown away the crutches, could walk anywhere and do my own housework, and I never felt better in my life than I do at the present time, and all this is due to the use of Dr. Williams' Pink Pills. I have also given the Pills to my daughter who suffered from anaemia and she has gained flesh and become a strong, healthy girl."

If you are suffering from rheumatism or any weakness, give Dr. Williams' Pink Pills a fair trial and they will speedily restore you to health and vigor. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 by The Dr. Williams' Medicine Co., Brockville, Ont.

BORDEN COPP DROWNED

Hopewell Hill (N. B.), Sept. 10.—A sad fatality occurred at Waterville yesterday when Borden Copp, eighteen years of age, adopted son of Aaron Copp, fell from a sailboat, when out pleasureing, and was drowned. The young man was alone in the boat and it is thought took a fainting spell and fell off the side, as he had been subject to heart weakness. The accident was seen from the steamer *Milado*, which was just leaving port, and a boat was sent to the rescue but the unfortunate man went down before he was reached and never came to the surface. The body was found after the tide had gone out. The young man's tragic death was a great shock to the community and much sympathy and regret is felt.

LACK OF DOCTORS IN THE UNITED KINGDOM

Serious Shortage For Some Time After the War—Lancet Makes Call on the Students

London, Aug. 28.—(Correspondence)—

The dearth of medical men in the United Kingdom is not only serious at present on account of the war, but it will continue for years afterward, in the opinion of the *Lancet*, the organ of the British medical profession.

In its issue of Aug. 28, the *Lancet* says: "That our medical schools will go very short of students is certain, and this will mean a dangerously small list of medical practitioners to minister to the needs of the country in the near future. The position is inevitable. The spirit which will lead young men of the military age and the educated class to join the army must have this effect, but it is the duty of the medical profession to face the difficulty and to make the best of it."

The great work which the medical contingent with the navy and army has accomplished in the present war will set later as a stimulus to enthusiasm for our calling, and the shortage which must occur in our ranks for the three or four years following—say, 1917, will speedily remedy itself, when our social world resumes, as far as altered circumstances will permit, the scheme which we had, with considerable lack of provision, come to regard as the normal one.

The war found the number of the medical profession in this country already disquietingly low, and with indications of further sagging in those numbers. The figures indicate a serious shortage of medical men for the years following the war. Not only has a large number of young men who otherwise would be beginning or pursuing their medical studies been absorbed, but, unfortunately, a serious toll was taken last autumn of those who, being already nearly qualified, would have been able to practice their professions as qualified men in a few months.

The future will see an increased demand for medical men, and their prospects of success will be so great that the aspirants will assuredly be numerous. And there will be an improvement in the conditions which have prevailed in the past, not only because the profession of medicine will share in social and material progress, but because the record of the work of medicine throughout the war has been such that it must lead to a closer relationship between the medical profession and the public.

"The British public are taking a more intelligent interest in these things, and the energy with which lay bodies are working in co-operation with the medical profession in carrying out various schemes for the well-being of the people may be taken as an indication that the health of the nation will be a first consideration of the immediate future—which means that there will be a great demand for medical men at the close of the war."

"And this is the essential message to the students now in the schools. They are already wanted as qualified men, and in the near future they will be wanted even more urgently. It is a patriotic duty, imposed upon them by the conditions of the world, that they should spare no effort to pass all their tests in the shortest legal time, while by doing so they will reap the double reward of good citizenship and worldly success."
