

"Had to Hide the Bottle

**So that the baby wouldn't
drink it all at once instead
of a teaspoonful."**

SO REMARKED ONE OF OUR CUSTOMERS.

We have been telling you about this Emulsion for some time. When you are well probably you do not read it, but when you are sick you will thank us for our persistence.

We tell you that it is the freshest Emulsion sold. We believe it, for we know how and when it was made. We make it ourselves in our electric emulsifier. It is pleasant to take and easily digested, because we use the best Norwegian Oil, and the newest crop. We import this Oil direct from the fisheries in tin lined barrels, so hermetically sealed that the air cannot get in to spoil it.

This Emulsion is useful in coughs and colds, curing them. It builds up the system, tones up the system and repairs waste tissue. For puny or delicate children, it has performed wonders.

COULDN'T GET OVER THE GRIPPE.

WM. KEMPSTER, 240 Park St. North, said:—My wife had the Grippe and couldn't get over the cold and cough. Everything that was used seemed to tighten instead of curing. She was this way for about seven weeks and I was afraid that she would never recover. I saw Parke's Emulsion with Wild Cherry advertised. One bottle has loosened up the cough and apparently she is in perfect health.

DOCTORS SAID SHE HAD CONSUMPTION.

CHAS JANE, 425 York St., Hamilton.:—My wife had been lingering along for two or three years with a bad cough and pains through back and chest. The doctors gave it as their opinion that she was in the middle of Consumption. Remembering how our little girl then one year old, had been cured with Parke's Emulsion with Wild Cherry, we got a bottle, and that one bottle has completely cured her. Her cough is gone, she is now in splendid health and able to do her own work. I am anxious to let others know the good it has done her.
