It can hardly be thought ridiculous to say of the return of Lieut. Peary and his asthat under certain circumstances a cake of of the return of field. Feary and his as-soap may be regarded as a medicine. There sociates from their long and perilous journey to the northeast.

1 THE I. C. R. DEVELOPMENT. The St. John Sun has been making a comparison of the I. C. R. in 1878 and in 1891. It finds that there has been a marked development since 1878 both in the mileage and rolling stock of the road, and in the quality of the road as to rais, bridges, tations and other important features. Here

are some of the facts and figures :-In 1878 the length of the government rail-

way lines was 950 miles. Government railway system in July of last year extended to 1.397 miles. (The Windsor branch is included in both statements.) The increase is was nothing revolting about it. The witnesses 447 miles, or 47 per cent.

Bat the quality has also improved. Light rails have been replaced by heavy ones The murderer met his fate calmly and Steel bridges have taken the place of iron bravely. He was apparently unmoved while and wood. Great improvements - have been 17.90 being strapped in the chair, and he ha made in the station buildings, freight houses nothing to say at the last. The electric and other passenger and traffic accommoda ions. The system of snow sheds and snow fences has been almost entirely developed since 1878, and old structures of wood have been replaced by stronger and more expenwith two long contacts. The complete time sive plant. Better and more extensive

fences have been provided. . . . Tice promised Dr. Sawyer, prison physi In 4878 the government railways were cian, several days ago, that he would close equipped with 123 engines. In 1891 the his left hand and open his right as he took uipment included 227 engines. his seat on the fatal chair. If he was co The number of first-class cars in 1878 was
