

Buildings.

THE COLLEGE BUILDING is situated on the brow of the University Hill, facing Main Street northward, and overlooking the Campus and the town. It is a large, substantial structure of pleasing proportions, containing many class and lecture rooms, an Assembly Hall, Library Museum, Chapel, Chemical Laboratory, Physics Department and the President's Office. In the east end of this building the Academy Classes (except Manual Training Classes) are conducted. The class rooms are successively adjacent, rendering the movement of classes from one room to another prompt and easy.

THE ACADEMY HOME, 85 x 45, contains three stories and a basement. It is adjacent to the campus, and faces it to the eastward. It provides comfortable accommodation for about forty-five students, is abundantly supplied with pure water from the town system, and contains bath room provided with hot and cold water. The Students' rooms are amply lighted, also well heated and ventilated.

THE EDWARD W. YOUNG MANUAL TRAINING HALL, erected through the generosity of Charles E. Young, Esq. of Falmouth, is 70 feet long and 36 feet wide, with a front portico and pediment. It is situated on the border of the campus, near the Academy Home, and faces the University and Seminary buildings.

One half of the lower storey is fitted up as an Ironworking Department. The other half is reserved for moulding, casting and machine work when funds are available for equipping it. Two-thirds of the second story is partitioned off for the Wood-working Department, the other third for the Drawing Department. The upper storey contains stock, etc., for student use.
