

YOUR LOVE SIGNS FOR THE 1990S

BY HELENA RAMONA STELLAR

ARIES

Since Saturn is squaring your natal sun (ouch), you may be practising celibacy this decade. Should you choose this route, the world will be the better for it.

TAURUS

This decade promises great fantasies due to Neptune's influence. Real relationships couldn't possibly measure up.

GEMINI

As Jupiter transits your solar first house, you will expand your self-awareness. Masturbate frequently.

CANCER

Uranus opposes your natal sun creating restlessness in your life. Some may say you have the itch but don't worry, it is probably an infection.

LEO

A conflict with Pluto may lead you to proclaim your sexual prowess but the world will know you're lion.

VIRGO

Jupiter will be squaring with your natal sun (again). You will conquer your innate prudishness in a frenzy of sexual activity. Stock up on KY.

LIBRA

As Mars crosses your natal sun, your ego gets caught up in your sex life (god forbid). Unfortunately, you have none.

SCORPIO

Pluto is lurking in your solar first house. You will find the intensity you've been seeking. Everyone you've ever hurt will take revenge this year.

SAGITTARIUS

Neptune graces your solar second house. You dream of starting your own business. Don't go into the sex trade, you'll go broke.

CAPRICORN

This may be a challenging time as the planets align on your natal sun. The good news is you won't have to worry about safe sex, you won't have any.

AQUARIUS

Your electric personality is expanded by a trine to Jupiter, bringing new voltage to your relationships. Stock up on batteries.

PISCES

Your natural spiritual involvement with the world remains strong. Listen to the inner music of your soul punctuated by the sound of a condom breaking.

NATURAL:

A Summer Sun Safe Tan is a totally natural process, there is nothing foreign or chemical added to your body — the only thing that determines how dark a tan you will have is the number of colour cells under your skin. We all have these colour cells in varying amounts, but they do not do much until they are stimulated by ultraviolet light. They then produce melanin, the pigment that darkens with U.V.A. light to produce a natural soft-skin tan.

HEALTHY:

Exposure to ultraviolet causes physiological benefits that are essential to our well being.

1. Improves blood circulation.
2. Increases red blood cell production.
3. Increases amount of oxygen carried to all parts of the body including the heart, lungs, brain and body extremities.
4. Body wastes are disposed of more efficiently.
5. Uric acid in the blood stream is dissolved.
6. Temporarily decreases high blood-pressure.
7. Increases resistance to disease and infection.
8. Temporarily relieves pain and discomfort of arthritis.
9. Ultraviolet is a well known treatment for symptoms of psoriasis, acne, oily skin, etc.
10. A great source of vitamin D₃ essential for stronger bones.
11. WE LOOK BETTER — WE FEEL BETTER.
