

In addition to the imports shown in the above table, there is also a considerable annual importation of "chalk, china or cornwall stone, cliff stone and feldspar, fluorspar, magnesite ground or unground," much of which is no doubt used in connexion with the manufacture of clay products. The value of these imports during the calendar year 1910 was \$121,959: of which \$90,131 was from the United States and \$29,646 from Great Britain. The value of the imports under this item during the calendar year 1909 was \$96,747. There is also an annual importation of "baths, bath tubs, basins, closets, lavatories, urinals, sinks, and laundry tubs of any material," the value of such imports during 1910 being \$262,667, as compared with \$211,837 during the year 1909.

Imported clay products are derived chiefly from Great Britain and the United States, although considerable quantities of earthenware, china and porcelain ware, white granite or ironstoneware, etc., are brought from Germany, France, Austria-Hungary, and Japan. The imports during the fiscal year, showing the country of origin, are shown in the next table. Of the brick and tile imported 74.4 per cent was from the United States and 25.5 per cent from Great Britain; and only \$607 worth from other countries. Of the earthenware and chinaware 63 per cent was imported from Great Britain; 14 per cent from the United States; 8 per cent from Germany; 6 per cent from France, and considerable values also from Japan, Austria-Hungary, and other countries. The crude clays were imported principally from Great Britain and the United States.
