

the milk containing 35.56 lbs. fat. Her sire is Ormsby Jane 4964, her dam Jess Aggie Neale 5251 and she was freshened at the age of 4 years, 11 months. 19 days: She was bred by Mr. Ernest M. Johnson of Richfield Springs, N.Y.; her fortunate owner was Mr. Oliver Cabana, Jr., of Elma, Ontario, N.Y. As the new queen of the 7-day division she displaced the great cow K. P. Pontias June 10623, whose record for seven months and 15 days is, 565.9 lbs. milk containing 3.83 lbs. fat. The test of this wonderful cow was made at the supervision of the New York State Agricultural College, and different supervisors being employed in the conduct of the test, the average being over 103 lbs. per day. But six other cows producing as much milk in seven days have produced over 500 lbs. fat; the best of these six being Sadie Vale 4060, 513 lbs. fat, 75.5 lbs. milk containing 10.10 lbs. fat. Ormsby Jane 4964 falls short but fits in the milk, while butchering at 12 months produced nearly five pounds—Malcolm H. Gardner, Supt. A. H.

ECHOES FROM THE GUELPH FAIR
An exceptionally good record was made at Guelph this year by W. H. Cherry, the Holstein breeder of Hagersville, Ont. Mr. Cherry had three animals in the dairy test—a three-year-old, a two-year-old and a mature cow. The 2-year-old secured first place, the 3-year-old third place, and his mature cow, Maude Snowbell, stood third in the general standing. This latter animal has been acknowledged by many of the breeders as the finest type yet brought this year. She is a dairy cow in every way, wide ribbed—a milk, a butter skin, and a particularly square udder. In fact, she carried one of the finest udders seen in the dairy test in many years—giving 7 lb. 4 in., with every quarter about equal in size. In the test she gave 80 lbs. milk, fourteen days after freshening. Even here she didn't do herself justice, as every day following the test, she made a gain of four pounds milk per day, and the Thursday following she made 94.6 lbs.—14.6 lbs. above her record at the test.

Lady Jane, who won for A. S. Turner & Sons, the Red Ribbon in the mature Aryholms, has just qualified in the R.O.P. by giving between 15,000 and 14,000 lbs. milk in eight months. Together with her attractive conformation, this makes Lady Jane one of the finest animals that was exhibited. She is a 3-year-old. Her average test in the R.O.P. was slightly over 4 per cent, and in the ten months of her test she had two butter calves. The first calf was second prize Jr. milk at Toronto National this year. This is certainly a record in combining production and registration. During the first six months of her test she averaged over 40 lbs. a day. Her milk was sold at \$1.50 per cent. at the farm, her 15,000 lbs. thus giving her an earning power of \$22,500 in the ten months. If the calves were estimated at even \$100 each, the two of them would thus add \$200 more to her earning ability—a total of \$24,500. Lady Jane is the utility type of Aryholms—the kind that it pays to keep.

Highland Ladoga Mercena, the mature cow that won first place in her class for J. O. Currie & Son, second second place in general standing. She was the Grand Champion over all the mature cows. This cow has producing ability behind her. Her seven-day record is 77.96 lbs. butter and 614.6 lbs. milk. In the R.O.P. as a "three-year-old she produced 12,444 lbs. milk, an average fat test of 3.65 per cent. This cow was sired by Prince Abbeke's Mercena that took first place at Toronto in 1913. She has a sister with a 25.8 record as a 3-year-old. Ladoga handles like a producer. She is well veined, square in the udder, and with her form and the record behind her, she is the type of Holstein desired.

WHAT THE FARMER CAN DO WITH CONCRETE

It contains information that has saved them time and money in making farm improvements. It has taught them the economy of building everything of everlasting concrete.

There's no other building material as durable, as adaptable, as easy to use or as low in final cost as concrete.

Practically everything that can be built of wood, stone or steel can be made better with concrete and this book tells you how to do it. It is fully illustrated with photos and diagrams and contains 52 practical farm plans.

If you haven't a copy, send for one to-day. Keep it handy. Refer to it often.

It is free and will be mailed to you immediately upon receipt of coupon below.
