

Let Your Next Binder be a Deering

THE Deering name has always stood for progress. The Deerings bought the patents of the first knotter. A Deering tag was on the first single strand fibre twine, and the first company to grow dissatisfied with the steel it purchased, and build its own roller mills was the Deering. It was this spirit of leadership which led them to make the Deering New Ideal binder to meet the demands of farmers in Eastern Canadian provinces.

These machines are made in Hamilton, Ontario, by Canadian workmen for Canadian harvest work. Ask the Deering agent to show you these points on Deering binders: The main frame made of high carbon steel bars, hot-riveted together, forming a unit which the hardest usage cannot twist out of shape; ball and roller bearings to make the machine light running; equipment for the use of either a smooth section or serrated knife, and, last but not least, the venerable Deering knotter, simple, accurate, unailing.

The Deering line is complete and of the same quality, whether binders, twine, mowers, rakes, tedders, or hay loaders. See the I H C local agent and make an inspection yourself, or, write the nearest branch house for a catalogue.

Standard Wire Fence

In the "Standard" Wire Fence, you get the durability that comes with strength. Made of all No. 9 Hard Steel Wire, well galvanized—which means no rust and long wear.

"The Tie That Binds" hooks on the running wire and locks smooth on both sides.

Then—there's the Standard Steel Fence Posts that hold the wires without staples—won't rot and are very durable.

We make a specialty of Galvanized Gates, too. Our new hooks are chock full of fence facts. Write for free copies and sample lock.
