

GENERAL NEWS.

The latest 'fad' in Chicago ladies is to have diamonds set in their teeth.

There are over fifty widows in New York who possess from \$1,000,000 to \$15,000,000.

'Woman feels where man thinks,' says an unidentified writer. Yes, and that's what makes him bald, says the experienced Richmond ('V.V.') Beau.

The London Globe on March 29 reports that Russia has entirely stopped the operations at the American Bible Society in the Baltic Provinces.

Five fairy tales written by Oscar Wilde are soon to be published. They will not be the first fairy tales, however which Oscar has written for the public.

It is proposed to boycott some eminent German doctors settled in London on account of the shabby treatment received by Sir Morrell McKenzie in Berlin.

NEW STEAMER.—The Dominion Government is considering the advisability of purchasing another steamer for the fisheries protection service and is now in communication with the Barrett-Johnson Iron Co., of Yarmouth on the subject.

VALUABLE RELIC.—The sword which George Washington wore when he resigned his commission at Annapolis, has been purchased by the United States government for \$50,000.

The probability of customs interference, it is said, has been averted by the decision of the Collector that the materials may rank as lumber in the eyes of owners and other are urging the government to maintain the export duty as on logs.

One of the queerest adventures on record occurred during Friday's rain storm at New York, when Frank Ward fell down drunk in a gutter in the Bowery and was washed into a sewer by the rain flood. He was rescued.

The Star says that New York city was founded by the Dutch, invaded by the English, rescued by Americans and French, occupied by Irish and dug out by the Italians.

As the British house of Commons becomes more democratic, it is said that sporting men are crowding in large numbers. The members now include rowers, cricketers, racing and hunting men.

An exchange reports that Miss Olive Green and Mr. Ivory White were married in Iowa recently by Rev. Mr. Black. It was reported by the color only lady, who thought she was turning White, became invisible Green.

He (admiring a vase of flowers)—'Aren't they beautiful? Do you know Miss Rouge, they remind me of you.' She (scold)—'But, Mr. Cute, they are artificial.'

He—'Ah, yes; but you'd never know it.'

Gen. Booth announced that the Salvation Army conducts 9,100 processions every week through the streets of the United Kingdom, or an average of 1,300 daily.

Seven thousand people were present at the marriage of the second daughter of General Booth, leader of the Salvation Army. The bridegroom is an ex-officer of the Indian civil service, named Tucker.

A woman at Argentine, Mich., has terrorized the whole neighborhood. She keeps firearms in her house to shoot any one who tries to evict her. Her landlord cannot collect his rent, and no one dares to refuse her anything, she asks for last she will kill him or set fire to his house.

The Philadelphia Press says: 'Dr. William H. Sadger, of this city, was recently presented with an education parrot. There is every reason to suppose the bird has never seen itself in a looking-glass until the other day, when it perched itself before a mirror, and prying critically at the reflection, the parrot suddenly threw back its head and exclaimed, with a shrill peal of laughter: "Gracious powers, what a sight!"

An ex-bank president in Charlotte, who is generally reputed to be one of the wealthiest men in the province, the other day claimed exemption from assessment on his personal property on the plea that its value was less than \$200. The assessors, to satisfy themselves, made a personal examination which confirmed the old gentleman's statement. His money is all invested in mortgages which pay better than silverware and plate glass mirrors.

At last a New York clergyman has tackled the question of Sunday newspaper work in a manner to show that he knows whereof he speaks. He pointed out the fact that it is the Monday morning paper that compels men to break the Sabbath. If any editor would be dispensed with, he would mark those of Monday morning for the sacrifice. In order that the editors, reporters and composers may be able to attend church and go to the usual evening prayer meeting.

The steamer 'Zealandia' arrived from Australia bringing the following advice:—'Brush fires have caused great loss to farmers throughout the country, hundreds of sheep have been roasted. The Government will regulate the introduction of diseases among rabbits for the purpose of killing them off. The various colonies are considering joint action to check the influx of Chinese. South Australia has imposed a poll tax of £50 on them. It is proposed to attempt the establishment of a sugar industry in Victoria. The Government is about to obtain control of sugar manufacturing plants from America.'

In Persia or Turkey, if a husband wishes a divorce from his wife, all he has to do is to order her out of the house. The Persian, however, has a custom which serves as a check upon this proceeding. The law gives all her own property to a woman who is turned away, and as a precaution against divorce the husband in the marriage contract is generally required to promise a considerable sum of money to his bride. This money is not forthcoming at the wedding, not expected, but it is placed to the wife's credit as a debt owed to her by the husband. As in case of divorce this money would have to be paid over, the amount is usually made so large that it is virtually beyond the husband's means. Consequently divorces are comparatively few in Persia.

In these days of faith cures and mind cures, people perhaps will be surprised to hear of a fright cure. A patient in the hospital at Milton, Georgia, who had not been able to use his limbs for twenty years, suddenly jumped out of bed the other day and made for the door. He honestly believed, however, that time that his legs were powerless and so did his physicians. The power that effected so wonderful a cure was the shriek of a man. One of the patients near him awoke in the night raving mad, and the supposed paralytic was so frightened at his appearance and the noise that he made that he forgetting his ailment, sprang out of bed and ran some little distance to reach a place of safety. The effect of the shriek was permanent. The man found that he could use his legs immediately prepared to leave the hospital. Did the shriek cure him or, as is suggested by some one, was he well for some time previous without knowing it?

RIGHT HERE IN CANADA.

WHAT YOUR FRIENDS AND NEIGHBORS SAY ON A MATTER OF VITAL IMPORTANCE.

Below will be found a sample of the multitude of letters of encouragement Messrs. H. H. Warner & Co., of Rochester, N. Y., daily receive. The subjoined unselected testimonials are from your friends and neighbors, ladies and gentlemen, who know and esteem for their honor and straightforwardness, and who would scorn to be a party to any deception. What has been done for others can be done for you, and it is fully, nay, suicidal, to longer suffer when the means of recovery lie at your very door.

International R. R. Dining Saloon, AMHERST, Nova Scotia, Jan., 1887.—In October, 1884, I was taken down with bleeding from the kidneys, or some of the arteries leading from them. One day, while lifting, I felt something giving away in the region of my left kidney and immediately after I commenced to pass blood in my urine. My doctor ordered me not to stop the flow of blood and I took 'Warner's Safe Cure' and began taking it unknown to the doctors, and in a few days I began to feel better. In three days the dropsy began to set in my legs and feet. By this time I was reduced to a mere skeleton, suffering from pains in my legs, feet and hands, also with dropsy, cramps, hiccuping, and other ailments. I was in a very bad way, and I had to be carried to bed. I tried all kinds of medicine, but to no avail. I had to resort to tapping at last, which was done every three or four days until the 27th of March. Then I was given up as hopeless, my spiritual director giving me the last dying rites of his church. I told them that I was at last ready to go, and that God and Warner's Safe Cure came out all right. I then began taking Warner's Safe Cure every three hours night and day, and in a few days I was able to get up. I continued to take Warner's Safe Cure and in a few days I was able to get up. I continued to take Warner's Safe Cure and in a few days I was able to get up. I continued to take Warner's Safe Cure and in a few days I was able to get up.

London to San Francisco.—Delighted to meet you by wire. It is just striking noon by St. Paul's clock.

Valencia to London.—Here is San Francisco, Cal., who wants to speak with you. For Ray is doing the cable transaction.

TOLD BY THE ELECTRIC WIRES.

One of the marvels of telegraphy was fully demonstrated last Sunday morning when operators in the Western Union Office in this city carried on an over hill and dale over mountain range with snow, through valleys of perpetual green, under the Atlantic with its unexplored secrets, over the vine-clad regions of Europe, and under the Mediterranean with Cairo, the land of the Pharaohs. The time was three o'clock in the morning, just after a heavy 'night' rain.

PROGRESS OF THE MARROW.—In 1850 the English sparrows in America occupied the area of a single tree or box. Now he disperses himself over an area of 865,000 square miles in the United States, and today in Canada.

ENDURANCE OF WOMAN.—It is a well known fact that a woman can swim in cold water very much longer than a man can, and the Swiss say that a man will freeze to death in almost half the time it takes a woman to succumb.

OUT OF THE QUESTION.—Old Lady—Where do you keep your unbleached cotton?
Young Lady—In the parlour. Walk this way, madam.

Old Lady—Land sakes! I couldn't walk that way if he was to give me the whole lot.

IN THE COUNTESS ROOM.—Collector—Here is the bill, sir, for your wife's Easter bonnet.
Husband—All right, call around after Lenten week.

Collector—But we'd like to have it now, sir, if it's all the same to you.

Husband—Well, I'll let it all the same, but I'll have it in the subject justice until after Lent. Good morning.

ABSENT MINDED UNITED STATES MEN.—They say that General Low Wallace is so absent minded that he surns his boiled eggs and salts and poppers his coffee. Hattie Choate, however, knew a man who was so absent-minded that after declaring that after he had left his watch home he deliberately took it out on him and sends greeting to his wife and time to go home and get it. Still the best case of this kind is where a bank cashier abstracts \$10,000 without knowing it is a pleasure to span half the globe to speak with them.

'The pleasure is mutual,' signalled Tom from the Western Union operating room. The Pacific speaking with the Nile through the Atlantic, the Bay of Biscay, and the Mediterranean sea is a wonderful feat.—San Francisco Call.

THE EMPRESS OF GERMANY, it appears, has her own way in the disposal of her inherited laurels. Her husband, the Emperor, for reasons of state, opposed the marriage of the Princess Victoria to Prince Alexander of Badenberg. The Princess, while serving in the army, incurred the anger of Russia, and Bismarck considered it in the highest degree impolitic that she should form a matrimonial alliance with the royal family of Prussia while he remained under the displeasure of the Czar. The Emperor and Empress did not take the subject and they would not allow fear of offending the Russian potentate to interfere with their intentions on this point. Bismarck, it is said, threatened to resign if the Emperor continued to favor the Badenbergs. The Emperor remained firm and Bismarck did not resign. Like other prudent people in a similar position he seems to have made up his mind to do what he cannot cure. As Alexander is not now Prince of Bulgaria, and as Bulgaria has elected another Prince in his stead with whose rule they appear to be well satisfied, it does seem a little unreasonable of the Emperor to have forced Alexander to abdicate a throne, to want to prevent his marrying the woman of his choice, particularly when his policy scheme, and as a desirable son-in-law. Most people who are not too old and too cold to be sympathetic will be pleased that in this contest with the man of blood, the Emperor has come off victorious. The politician says that this is only the first of many battles between the Emperor and the Chancellor. The antagonism between these two persons is, they say, so great and so bitter that more serious struggles are not far off.

The proverbial 'Nile' which was launched at the Pembroke shipyard on the 27th of last month, is an immense structure. She is the heaviest ship of war ever launched in Great Britain. Her weight is 1,700 tons, and she is built of steel, she has not been quite two years in the dock. Another ship was built at the rate of \$100,000 a week. The cost of construction was about \$70 a ton. She measures 345 feet in length between the perpendiculars and is 73 feet in beam. Her draught is 27 feet forward and 28 feet aft. Her displacement is 12,000 tons, and the engine which drives her has an indicated horse power of 12,000, and is expected to drive her at the rate of 16 1/2 knots an hour. She is built to be an invulnerable ship, but she has a protective deck being divided into 120 water tight compartments. The 'Nile' is built to resist the most powerful artillery in use, and she is to be armed so as to make her as formidable a sea as a vessel in its present state can produce. The difficulty with war ships in these days of scientific and mechanical progress is that they are apt to become so obsolete. The ship which is regarded to-day as impregnable may three years hence be entirely out of date. Whether or not this is to be the case with the 'Nile' time alone can tell.

The popularity of General Boulanger is exciting alarm in some quarters in France. He has been elected for two departments by very large majorities. It is seen that the very means taken by his enemies to ruin that favorite of the people have increased his popularity and his importance. General Boulanger as a general in command of a military district was a comparatively unimportant person, but General Boulanger presided by politicians jealous of his influence has become a power in the State. It is said that the present Government is friendly to Boulanger and that they have no objection to his return to active politics. But there are those who look upon him as a dangerous man, and persons both as regards the State and the Republic. The German government and the ambitious designs which he himself entertains. Boulanger emphatically declares that he is for a continuance of peace relations between France and all the world, and that there is nothing that more ardently desires than that the Republic should be established. He will be soon what effect his election to the Chamber and his great and rapidly increasing popularity will have on the foreign relations and the domestic policy of France.

Signs of the Season.—In the spring the gentle archon plays with marbles on the walk.
In the spring the politician oils his mouth for future talk.
In the spring the latest fashions on the duddetud do appear.
In the spring the long-haired poet works his muse to get zwi bier.

All Sorts.

There is a woman in Kentucky who is looked up to by every man in the State. She is six feet seven in her stockings.

Mother—And do you really feel so very bad, Bobby? Bobby—Yes, ma, I ain't quite sick enough to need any medicine, but I'm a little too sick to go to school.

PROGRESS OF THE MARROW.—In 1850 the English sparrows in America occupied the area of a single tree or box. Now he disperses himself over an area of 865,000 square miles in the United States, and today in Canada.

ENDURANCE OF WOMAN.—It is a well known fact that a woman can swim in cold water very much longer than a man can, and the Swiss say that a man will freeze to death in almost half the time it takes a woman to succumb.

OF THE NAVY.

Proprietary medicines none have stood better the test of public opinion than the well known remedy PUTTNER'S EMULSION. There are many reasons for this popularity, amongst which is the fact that it is made from the purest material, is scientifically compounded, is very pleasant to take, is of nice appearance, and is not liable to cure anything, but for Weak Lungs, Nervousness, Impure Blood, Scrofula, General Debility and for building up delicate children it is invaluable.

BROWN BROS. & CO., Chemists, Halifax, N. S.
