HARD TO GET THERE.

Fourists Find It Difficult to Enter Biblical City of Jaffa.

Jaffa is a historical biblical city immorsed in a common-place present of uncleanliness, congestion, petty commerce and fearful and wonderful Turkish officialdom. Practically travellers in the Levant and Palestine sightseers pass through Jaffa, for it is the port of Jerusalem, where ene lands if anything by boat from Greece or Egypt, and few such travellers carry away any notably pleasant impressions from the city by the sea.

Very often you are lucky to land in Jaffa at all. Jaffa at all. The port authorities may have laid a quarantine against goods or passengers embarked from Alexandria-this happens not infrequently-and in such case you must voyage up and down the coast of Calestine until the quarantine flag is

Or else the seas' may be too high for your boat to make a landing, and continue so until the patience of the authority of the captain is exhausted, in which case you will also get a longer sea voyage than you bargained If the elements and the health enthorities are both in favorate mood at the same time you can land in the old city that flourished in the days of Solomon.

quarantine regulations may give you the impression that Jaffa is run on sanitary principles, but the elty itself quickly dispels your illuslons. Apparently the local government is stricter about imported danger of disease than its homogrown varlety. Jaffa is no worse than any other Levantine port, neither is it

noticeably better.

Few travellers stay any great while th Jaffa, and as a result accommoda-tions are of the sketchiest. You may find yourself in an Asiatic hotel, in a monastery or in the house of some hospitable European if there are an unusual number of strangers in the vity. The shortness of your stay is

Jaffa to-day is a city almost purely ommercial. You carry away an imcommercial. You carry away an im-pression of narrow and twisting streets hadly in need of a corps of treets hadly in need of a corps of white wings, of mean houses and an occasional imposing mesque: of a population at once madly energetic in trade and constitutionally fatalistic at the same time shrewd, avaricious and good natured. - Exchange.

READY-MADE TANKS.

Armadillo, for Instance, is Well Protected Against Assault.

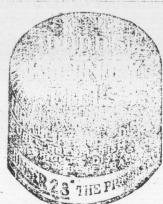

Now that fighting men are going back to the wearing of armor, for protection in battle it is interesting bas has back to the wearing of armor, for protection in battle it is interesting bas based of 3,000 feet, at which point the presmade similar provision for many

The early Spanish invaders of trorhe early spanish invaders of tro-pical America were greatly interest-ed in certain species of armoured nammals, wholly new to them, which they found plentifully distri-buted over that part of the New World. They called them "arma-dillos," because they were encased in coals of mail. in coats of mail.

The so called

The so called "great armadillo" attains a length of nearly five feet. attains a length of nearly five feet. It is clad in a complete coal of flintlike armor-plates, and its tail, as solid as if forged in metal, has the shape of a trumpet. In fact, the aborigines of the Amazon valley use it as a trumpet for signalling in war. Even the smaller species of armadillos, however, are equally well protected, the head being defended by a sort of helmet. If attacked by a

tected, the head being defended by a sort of helmet. If attacked by a beast or bird of prey, the creature instantly rolls itself into a ball, thus rendering itself into a ball, thus rendering itself proof against injury. In ancient times there lived in South America a giant ancester of the modern crimiffles. One of its huge shells, some years ago, was found by an Unglish naturalist in use as a playhouse by half a dozen children. In another native camp it. In another native camp

was in the Pampas region) he came across a trumpet as big as those commonly employed on ships. It was the tail of a specifien of the extinct armored mammal.

Alligators and crocodiles, course, are familiar to-day as types of the armored reptile. They are clad in complete mail, which is certainly proof against buckshot, and is hardly penetrable by a rifle bullet, unless a weak point in the armor be struck. Such a bullet, striking one of the plates, is fairly sure to be de-

flected harmlessly.

There are no armored birds. far as known, there never were any. It is a fact accepted by naturalists that all birds are descended from reptiles, but in the process of acquiring wing and featners for purposes of flight they might have been expected.

pected to discard unnecessary encumbrances.

In antediluvian days there were many species of armored fishes, some of which are represented to-day by survivors, in this respect, degenerate. Evidently nature, which generate. Evidently nature, which is forever making experiments, did not think the idea worth perpetuat-

In the insect kingdom, however, In the insect kingdom, however, there are to-day not merely a few, but fundreds of thousands of armored species. These are the beetles, which are clad, in complete suits 'o' mail. Their armor, in fact, is made of a material far more indestructible then steal—namely "chitine." Chithan steel—namely, "chitine." Chi-tine cannot be destroyed except by

tine cannot be destroyed except by certain mineral acids.

There are several species of beetles whose "shining armor" is reputed to contain gold or silver, and, owing to this belief, people often gather them and melt them. Most remarkable of these are the "gold bugs" of the genius "plusiotis." One night easily imagine a specimen to be the work of some clever artificer in metal, the head and wing cases being brilliantly polished, with all the seeming of metal to sight and touch, and with a lustre as of gold itself.

Minard's Liniment Cures Burns, Etc INDUSTRY AND SCIENCE.

The Chinese want more railroads, which may mean business for American capital and builders.

During the five-year period ended in 1914 Georgia surfaced 6,364 miles of her roads. This is at the rate of more than four miles per working day. At the present time China has but

6,000 miles of railroads to serve a population of more than 400,000,000. After a moving picture reel has been made, it must be "edited" in somewhat the same method as is a This operation is permanuscript. This operation is per-formed by the editor making his di-rection in a dictating machine as the

reel is worked off in front of him. There are 450 manufacturers of automobiles located in 32 States, and 825 manufacturers of parts and accessories located in nearly every State.

A new vacuum cleaner is driven from power derived from the water

spigot.
The latest thing in window screens rolls up like the shade where there is not inneed ate demand for its services. Fome of the California Indians store their corn supply in willow bas-

kets, which are as large as the rooms of a modern-sized house.

Many pigs die from becoming over heated in the cars while in transit.
This is being taken care of by a western railway company by providing a

shower bath attachment in the cars for cooling the pigs off at regular intervals. tervals.

Domestic sales of incandescent tamps in 1913 were 145,000,000, which is 31 per cent. or 25,000,000 lamps greater than 1915 sales. In addition, over 9,005,000 lamps were exported in 1916, making total sales for last year

of 154,000,000 lamps, in comparison with 116,000,000, the total number of sales that was recorded in 1915. It is estimated by the National Au-tomobile Chamber of Commerce that 1,500,000 automobiles were manufac-tured in 1916, valued at \$\$40,000,000.

sure should be great enough to crush Of the English women who have recently been instructed in carpentry at Byfleet, England, 20 are now said to be in France helping in the erection of huts for the soldiers. French and Belgian women are also engaged in
