# Dairying is Most Profitable

Prices for Dairy Products have held firmly, while the cost of feed has been greatly reduced. Because of this, there is relatively more profit than ever in dairying, and many farmers are turning low price feed into high priced butter fat.

Times like these prove the value of dairying. It is the backbone of the

of dairying. It is the backbone of the nation's agriculture—the most profit able, surest and safest of all branches of farming. Dairying is not suffering from over production, is not over crowded or over done.

An eastern college has announce hat its experiment staffon has discovered a fertilizer that will grow

covered a fertilizer that will grow grass and destroy weeds.

This dream of gardeners, a weedless lawn, is possible without trouble or expense, the announcement says.

Merely use ammonium sulphate in the place of nitrate of soda in the regular application of fertilizer.

The "why" of the discovery, as the discoverers explain it, is that gardeners almost universally have supplied nitrogen, the chief element in grass food in the shape of nitrate of soda. That in time creates an alkaline soil condition especially favorable to weed growths. Grass is crowded out.

Then, by using the not more expensive ammonium sulphate in the same quantities, proper nitrogen is supplied and the soil kept in an acid condition under which grass develops best, but in which weeds are weakened.

The fountain of youth and perpetual motion would be great discoveries, but the discovery of a method for growing the weedless lawn is worth the 20 years devoted to it.

person can help sympathizing with a man who stands facing so mysterious an opportunity, or fail to to der stand his desire to lean upon a higa er help than the strength or wiscom of man. It is righteousness which exalteth a nation; and it is a cheering thing to be told that in Mr. Harding's office there is not only an engraving of Lincoln and a portrait of Rooseveit, but a Bible which is valued and worn. An intimate friend of Mr. Harding's asys that the new President is of the opinion that the Government of the country would be none the worse if it had more of the real spirit of religion in it and that, one day, he said these very remarkable words: "I have never read my Bible so closely as in the past few weeks when my mind haben bent upon the work I must shortly take up. I have obtained a good deal of inspiration from the passages of the four Gospels, and there is still wisdom in the sayings of old Sobmon." A prominent British journalist says that on inauguration day the new President asked that the Bible that George Washing ton assed be opened at Micah G:S, the text he had chosen upon which it take the cath of office. It is truly
