PEPS

the real breatheable tablets, make the throat, chest, and lungs cold-resisting. When a nasty cold or a coughing bout foretells the revival of your old bronchial trouble, the best thing to do is to take Peps at once to strengthen and

PROTECT

the chest. When a Peps tablet is taken from its preserving silver wrapper and allowed to dissolve in the mouth, it gives off powerful medicinal and germicidal fumes that immediately circulate with the breath through all the air-passages, and destroy any germs that have got into

YOUR

nostrils and throat. At the same time the sore, inflamed membrane is soothed, healed, and protected, phlegm is released from the bronchials, breathing is made easy, and that distressing cough and throat soreness disappear. By this direct treatment Peps keep trouble off the

CHEST

and lungs, and the worst weather can be faced without fear of evil consequences. It is the safest plan to always have a few Peps handy to arrest a cold, and prevent it reaching the lungs or starting bronchitis and chest weakness.

Peps

Fisheries Production Of Canada

The Dominion Bureau of Statistics have issued a preliminary statement of the Fisheries Production of Canada for the year 1919 prepared from the compilation of returns collected by the Bureau in co-operation with the Fisheries Branch of the Department of Marine and Fisheries. The total value of fish marketed fresh and of fish products is given as \$56,485,579, compared with a value of decreases both in value marketed and quantity caught. The catch of haddock, halibut and cod was greater in 1919 than in 1918, while the value marketed was less. Salmon, lobsters and mackerel showed increases both in quantity caught in value marketed. British Columbia fisheries had a value of \$25,301,607, which is a decrease from 1918 of nearly two million dollars. Nova Scotia fisheries were valued at \$15,171,929, a slight increase over 1918. Prince Edward Island, Ontario, Saskatchewan and Alberta showed increases in value, while New Brunswick, Quebec, Manitoba and Yukon showed decreases.

Of the principal fish products, canned salmon is given at 1,394,215 cases, valued at \$13,342,140 in 1919, a slight decrease both in quantity and value from 1918. Canned lobsters were reported at 123,759 cases valued at \$4,095,934 in 1919, compared with 107,812 cases valued at \$2,254,690 in 1918. The quantity of canned sardines was 119,225 cases valued at \$593,811 in 1919, compared with 177,193 cases valued at \$1,227,985 in 1918. Increases in quantity and market value are noted in dried cod and salted mackerel, and decreases in green salted cod and pickled herring. Of fish marketed for consumption fresh, the principal varieties in point of value were halibut, 240,728 cwt., valued at \$5,114,416; salmon, 460,413 cwt., valued at \$3,324,158; whitefish, 196,953 cwt., valued at \$1,845,854; lobsters, 85,340 cwt., valued at \$1,224,882. Other varieties which showed large quantities marketed for consumption fresh were mackerel, herring, cod, smelts, trout and haddock.

Exhibition of Ranch Bred Silver Foxes

An unique exhibition under the immediate management of the Commission of Conservation of Canada, will be held in Montreal on November 24th, 25th, and 26th. It will be the first international exhibition of ranch-bred live silver foxes. Fur-farming is rapidly becoming a scientific branch of animal husbandry and, although little more than a decade old, is one of Canada's most flourishing infant industries.

While the greater number of Canadian fox ranchers are to be found in the Maritime Provinces and chiefly in Prince Edward Island, there are many in each of the other provinces and the number is steadily increasing. The interest evinced in Quebec, Ontario and Western Canada generally demonstrates that many Canadians are desirous of embarking in the fur-farming of mink, beaver, fisher, marten and other fur-bearers.

Present advices indicate that fully 150 animals will be brought from Prince Edward Island alone. It is confidently expected that other provinces will send an equally large number in proportion to the number of their fur-farmers and many enquiries have been received from the United States. The Secretary of the exhibition is Mr. F. C. Nunnick, Commission of Conservation, Ottawa.

A healthy growth of the industry should do much to check the rapid depletion of wild fur-bearing animals and to steady unstable conditions in the large fur markets. It is confidently expected that the exhibition at Montreal will result in the formation of a Fur Breeders' Association of Canada, which can do much to establish and keep accurate breeding records of pedigreed fox stock and, in general, advance the interests of the industry.

Retail Clothiers Will Demand Aid

OTTAWA, Oct. 26—Claiming that it is just as reasonable to give aid to other branches of merchandising which have been "interfered" with by the Board of Commerce, retail clothiers and shoe dealers will expect the government to give them financial assistance if similar support is given the sugar refiners in Canada, as is anticipated. This attitude was expressed at a meeting of the executive of the Ottawa branch of the Retail Merchants' Association of Canada held this morning to discuss various matters in connection with Ottawa branch affairs, and embodied in a resolution which will be put before the first meeting of the branch for endorsement.

Mr. W. J. McKerracher, vice-president of the Ottawa branch, gave notice of the resolution.
