Deer Lake Pulp Scheme.

Yesterday in the House of Assembly, on the eve of the close of the 1912 session, the Prime Minister, Sir Edward Morris, moved the House into a Committee of the Whole for the consideration of Resolutions on the subject of the development of a Pulp and Paper Industry at Deer Lake. A number of Americans have formed themselves into a company, known as the American Pulp and Lumber Company of Grand Rapids, in the State of Michigan, U. S. They have purchased the right to cut timber over some 600 square miles along the shores of Deer Lake. The properties were originally leased to R. B. Job in 1904, Robert C. Pike in 1903, and Christopher Fischer, of Bay of Islands, in 1903. They have spent a large sum of money in acquiring these rights from the original owners and in making surveys, and propose to expend a large sum on the erection of pulp plant, etc. They find, however, that there is not sufficient water in the vicinity of Deer Lake, and the Government has granted them among other concessions, subject to the approval of the Legislature the right—

(a) to raise the waters of Deer Lake fifteen feet above high water mark;

(b) to raise the waters of Grand Lake ten feet above low water mark;

(c) the use of Junction Brook waters, with a proviso that the rights are not exclusive.

Provision is made for compensation for injury caused to lands of the Government or private parties by the submergence of land which may result, and a security of \$250,000 is to be deposited by October 1st next for the payment of such compensation.

The right of importing material and machinery for original constructions and installations during the next 30 years is also conceded. The work is to commence by May 1st, 1913.

The Prime Minister quoted letters from Mr. James Howley, Geological Surveyor, and Mr. Bayley, as to their impressions of what would result from the damming of the Lake to the heights proposed; and also letters from two bankers as to the financial and business standing of the members of the Company.

Mr. Kent criticized the nature of the evidence adduced by the Prime Minister as to the results of the raising of the levels, and said that the House should have more accurate information before it committed itself to the scheme. He also did not approve of approaching the House for special rights in every new scheme, as he thought there should be some general law dealing with the concessions which could be granted for encouraging and fostering the Pulp and Paper Industry.

The child when an infant lost the use of his tongue, the result of an attack of measles, but was in fair health and retired last night at an early hour. Dr. Anderson, who was called, pronounced death to be due to heart disease.
