#### Lambeth Bees Break Records

Keeping Up Honey Production Even on Sabbath.

D. Anguish, an apiarist, living at Lambeth, has a hive of bees which he claims has established a record. They have brought in 146 pounds of honey in seven days. He states that this is authentic, as they were kept on the scales all the time. Much of the honey is basswood and clover, which is considered much superior to the ordinary buckwheat honey. That these bees have little respect for

the Lord's Day Alliance, or that there is no such organization in Lambeth, is evidenced by the fact that one of their best days yet was last Sunday, when they brought in 23 pounds of honey. Here is their record so far this month
