LIME AS A FERTILIZER
The agricultural Value of Ground Limestone has been thor-
oughly proven at Kentville and other Experimental Farms. LIME
is one of the essential elements in plant structure. Each year's crop
removes a certain amount of Lime from the soil, and this has been
going on for years. As a result most land is deficient in Lime, and
unless it is supplied from time to time best results cannot be hoped
for.
We have taken the agency for a high grade of New Brun-
swick Ground Limestone and will have a quantity arriving
by first trip of the steamer.
We also sell the National Fertilizer Company's Fish
and Potash, Grain and Potato Fertilizers, etc
All orders should be booked NOW as the supply is limited.
