Also, W. & R. Wallace, Gardner's Creek, N.B., with 60 foot Ship Yard Carriage.

Champion Portable Saw Mills

12, 16, and 20 H. P.

Grange Book writes as follows:—"St. Agnes, Ont., July 27th, 1882.—I have just finished sawing with your 20-horse power Champion Engine, and No. 3 mill before harvest. At the last piece I set down, we cut 315,000 feet, mostly 12 inch, 70,000 being 6 in. in six weeks. We were just ten weeks from time we moved mill till we returned home with it. We saved the above without an accident or delay of any kind. I have run the mill now three years almost constantly. I find no trouble in keeping up steam with the 6000 and refuse just as it comes from saw and frequently use a portion of the sawdust. I can saw 2,000 feet 1-inch lumber in an hour.

The following are a few who have bought these

- Canada Pacific R. R. Co.
