

Bell, P. H., title.....	2515	Snow, G. B., apparatus for ringing locomotive bells.....	2515
Hill, L. M., moidling machine.....	2501	Stacy, G., & G. P. Clapp, fire escape.....	2498
Hitchcock, John, Wm. H. Hopkins, and Joseph A. Talpey, Fire-escape and mechanism for lowering goods.....	2502	Stacy, G., & H. Mulholland, chisel pointed nail machinery.....	2497
Hopkins, Wm. H., Joseph A. Talpey, and John Hitchcock, Fire-escape and mechanism for lowering goods.....	2502	Talpey, Joseph A., John Hitchcock, and Wm. H. Hopkins, Fire-escape and mechanism for lowering goods	2502
Horton, S., gas purifier	2523	Taylor, J., pot strainer	2547
Howard, E. J., & J. Tesseyman, valve gear for steam en- gines.....	2548	Tesseyman, J., & E. J. Howard, valve gear for steam en- gines.....	2548
Howell, Wm., rake and pea harvester.....	2551	Thibaudenau, G., machine for sweeping streets.....	2507
Hunt, J., easy lounge.....	2538	Thomas, H., carving machine	2540
Hunter, C. D., & E. S. Wood, inhaler.....	2531	Turner, Isaac, railroad car coupler	2506
Ives, H. R., & R. N. Allen, blind hinge	2591	Valois, P., & G. Bastien, washing machine	2536
Jenkins, C. F., & A. B., steam packing	2517	" " " " " "	2537
Jones, E. L., & G. H. Dayton, carburetting air	2555	Walmsley, J., harvester reel.....	2509
Kaiser, J., grain or corn crusher.....	2542	Walter, C. H., & E. L. Mills, (assignees), folding down stake for railway cars	2527
King, B. P., capstan and windlass gearings	2484	Walton, R. L., stake holder for cars	2563
King, B. P., hawser pipe	2180	Warden, C., & J. B. Plumb, iron and steel process	2496
Knowlton, E. J., portable bath	2525	Webster, O., cow milker.....	2544
Korwan, F., gas apparatus.....	2504	White, J. B., & H. Wilson, combination lock	2477
Lamb, D. M., water proof gum.....	2492	Whitely, W. N., harvester.....	2541
Lehman, C., soap crutcher.....	2529	Whiting, L. P., adjustable lathe dog.....	2511
Leishman, M., shirt	2564	Wiggin, J. E., an eyeletting machine.....	2601
Lewis, J. D., child's spring crib	2519	Wigle, J. J., & A., horse hay fork	2482
Litchfield, L., horse rake	2535	Wilson, H., & J. B. White, combination lock	2477
Little, J., horse shoe sharpener.....	2568	Winer, John, self-supplying coal cooking stove.....	2597
Ludlam, J., harpoon fork	2483	Wood, E. S., & C. D. Hunter, inhaler	2531
Lynch, M. A., lamp lighting apparatus.....	2474	Wood, O. R., grain cleaner.....	2524
Marchand, Henry E., car coupler.....	2594	Woodbury, D., horse power	2506
Mawhinney H. H., assignee, eyeletting machine.....	2601	Wright, D., reeving machine	2518
May, J., & C. B. Pettit, metal fence post	2556	Wright, J. J., newspaper addressing machine	2503
Meday, J. P., & H., & P. Moran, adjustable horse shoes.....	2490		
Melchers, J., hitching post.....	2487		
Merritt, D. S., machine for cutting iron.....	2478		
Mershon, A. H., gas heater.....	2472		
Mills, E. L., & C. H. Walters, (assignees), folding down table for railway cars.....	2527		
Mills, E. L., & C. H. Walters, (assignees), folding down stake for railway cars.....	2527		
Moore, Wm., bed bottom	2566		
Moran, H., & P., & J. P. Meday, adjustable horse shoes.....	2490		
Mulholland, H., & G. Stacy, chisel pointed nail machine.....	2497		
McGill, J., (assignee), soap crutcher	2529		
McGlashan, J. W., folding down stake for railway cars.....	2527		
Neil, W., refining and distilling apparatus.....	2574		
Norman, A., & G. Read, seamless gaiter	2583		
Parroll, J. S., & E., bolting machine	2588		
Pedlar, G. H., drum heater	2550		
Perry, F. H., twisting yarns.....	2573		
" spooling machine.....	2582		
" journal bearing and holder.....	2583		
Pettit, C. B., & J. May, metal fence post	2556		
Plumb, J. B., C. Warden, iron and steel process	2496		
Reed, G., & A. Norman, seamless gaiter	2585		
Rider, T. B., & H. M., & N. A. Beach, measuring and roll- ing cloth	2501		
R bertson, H., sewing machines	2575		
R bertson, J., oscillating steam engines.....	2584		
R bertson, J., (assignee), do do	2584		
Robinson, Wm., electric railway signal.....	2499		
Ross, H., wash boller	2577		
Sabin, J. W., & S. F. Emerson, harvester grinder.....	2551		
Schreck, E., governor valve.....	2546		
Seabury, F., J. S., & A. D., & Grant, A., & N., & H., wood fill- ing.....	2590		
Shaw, William, (assignee of W. Bignell,) A respirator	2595		
Simmons, T., & A., & C. T. Clemens, gas burner.....	2528		
Smith, E. D., car coupling.....	2502		
Smith, J. N., brick press	2522		
Smith, V., compound for dental purposes.....	2553		

ADDITION TO THE RULES AND REGULATIONS

(SEPTEMBER, 1872)

OF THE

CANADA PATENT OFFICE,

JANUARY 14th, 1873.

1. DRAWING.

In order to allow the Patent Office to have a Patent Office Record printed and published, containing the Claims and Drawings of all Patents issued, it is further directed, in addition to the requirements of Rule 13 and Form 15, that—

One Drawing on a sheet of card board, 8 x 13 inches, will be required of each invention, in addition to those ordered by Rule 13 and 15; the sheet is to be without writing on its face, merely the usual lettering required on the Drawing; written title, references, certificate, signature, &c., not being necessary.

Where several sheets and figures are furnished, in accordance with Rule 13, any one figure, which will best give a general idea of the invention, will be sufficient.

The card board to be used must have a smooth or calendered surface—a sheet of "double thick Bristol board," or "Whatman's drawing paper," is recommended.

All drawings must be clear, sharp, well defined, not too fine, and perfectly black.

NOTICE.

Lines that are pale, ashy, very fine, ragged, or rotten, give bad results when photo-lithographed.

Brush-shading, tinting, and imitation surface-graining, should never be used; and in fine shading the result should be attained with as few lines as possible.

Section lines also should be as open in their spacing as the case will admit of, and these, as well as all right lines, in order to insure clearness, should be made with a ruling pen. The shading of convex and concave surfaces may be dispensed with when the invention is otherwise well illustrated.

Shade lines may sometimes be used with good effect, but heavy shadows, where they would obscure lines or letters of reference, should be avoided.

The card board drawing should be rolled on a roller for transmission to the office, as folding will prevent its usefulness for photo-lithography.
