

finest Canada malt, four times more concentrated than the ordinary syrups of malt, yet of the density of ordinary fluid extracts, and containing diastase in a normal and highly active state, with very little maltose, and as digestive aids have no equal. Samples furnished upon application.

**CUTICURA OINTMENT.**—The much advertised "Cuticura Ointment" has been found to consist of a base of petroleum jelly, coloured green, perfumed with oil of bergamot and containing two per cent. of carbolic acid. —*Northwestern Lancet.*

An exchange of recent date says that surgeon's plaster is a simple and reliable remedy in chilblains. It is especially serviceable when the feet are attacked; it is easily applied to the big toe and heel. A salicylated plaster is of great value, as it helps any decorticated spots to heal. The plaster is applied and allowed to remain on for three days, when the trouble will be found cured. After this it will possibly have to be renewed on account of it soiling easily. It may be used on the hands of cooks and those who work in water.

**THE TREATMENT OF WARTS.**—Prof. Kaposi, of Vienna (*La Semaine Medicale*, No. 52, 1893), recommends, when the warts are solitary, removal by the knife, but when multiple, and especially on the face, he employs the applications of thuya occidentalis or fuming nitric acid. Vegetations are best treated by dusting with resorcin or salicylic acid or a plaster of 10 to 20 per cent. Resorcin, if applied for a long time, acts as a caustic, and may irritate the surrounding normal skin. These same topical applications are also excellent in keratosis palmaris and plantaris, even when they are not wart-like. In multiple warts of the face he employs the following:

R Flower of sulphur.....gms. 20 (3v)  
Glycerine.....gms. 50 (3jss)  
Pure con. acetic acid....gms. 10 (3ijss)

Apply locally to each wart.

They dry up, become bluish, and drop off. Continue this for several days. In mollusciform nevi electrolysis is the best treatment, except when the tumours are voluminous, when the galvanocautery or caustic may be used. —*Lancet-Clinic.*
