## Just What She Wants

**T**HE Overland Coupe is especially designed for *madam's* comfort and requirements.

The doors are of extra width and height. This permits her to wear her largest hats, without the inconvenience of stooping or turning sideways when she alights or enters.

As the body is very low only a short step is necessary when getting in or out.

This model comfortably seats four—without crowding the occupants or crushing their gowns.

The seat cushions are deep and soft.

The method of driving is the simplest yet devised.

On the steering column is a small set of electric buttons. By just pressing these buttons the car is started, stopped and lighted.

The interior is finished in that fashionable mouse gray Bedford cord cloth.

The first look at this little beauty will bring you to the full realization that there is but *one* Coupe for you—the Overland.

Deliveries can be made immediately.
