In regard to the time for going through the Falls, near St. John, it may be mentioned that the Falls are level (or still water) at about $3\frac{1}{2}$ hours on the *flood*, and about $2\frac{1}{2}$ on the *ebb*, which makes them passable four times in twenty-four hours, about 10 or 15 minutes each time. No other rule can be given, as much depends on the floods in the River St. John, and the time of high water or full sea, which is often hastened by high winds, and in proportion to the height of them.

THE END.
