I want the old song of the river, The little low laugh of the rills, I want the soft blue of September Again on the hills.

Adrift With Autumn. Dear Miss Grey,-I've wanted to write for so long, but somehow I didn't. It is very interesting to read the letters of others who write to you, and wonder who they are, and where they live, and what they do, and all the rest of it. I'm a hybrid, you see, for neither I'm a hybrid, you see, lot licture, town nor country can claim me entirely. I have lived in both. But the country always draws me, especially in the fall. It's bad ecough in the spring, for then I am so lazy that I can't work, and I want to go to the woods to pick flowers and get dreamy and almost sentimental. In autumn something seems to be pulling me away so soon as I smell frost in the air. It isn't a dreamy longing; it's a flerce desire. I want to go out of town and walk and walk. The red leaves challenge me, the yellow I get to thinking about mushrooms, and butternuts, and red snow-apples, and piles of rustly dead leaves, powdered with frost. And sooner or later I have

with frost. And sooner or later I have
to go.

And when I go this time I'll walk
down a lane, with fleids on one side,
and a fence on the other. And some of
the fleids will be seeded with wheat, and
some will be corn fleids with the corn
shocked up and rustling. There will be
a stripy chipmunk on the fence scolding
ine, and if I look very closely I may
see some naughty little mice in the
corn.

There will be wild grapes with powdery bloom on them clustering over the fence, and when I eat them they will stain by greedy mouth with scarlet will stain by greetly motion with stain that turns to purple.

And I shall pick bunches of goldenrod, and big purple asters, with a faint
druggy smell like camphor.

Then I shall go and look at the ears
of seed corn hanging in bunches by their
braided husks from the top of the
granary, and the smoked hams and sides
of bacon hanging from the cross-beams. of bacon hanging from the cross-beams. And while I stand there I shall likely hear the rats burrowing into the wheat

Now I hope I haven't tired you with this description, but likely I shan't write again for some time, so please say good-bye to WITCH HAZEL.

is certainly the diapers.

Diapers should be cut in yard lengths, and finished with a very narrow hem. When doubled they then make a square. If there is in the house a good supply of old damask it can be cut into eighteen-inch squares and hemmed, to be used inside the other diapers. This is a great saving in washing, and is very pleasant for the baby's skin, especially while the new diapers are still very stiff. Other materials sometimes used for diapers are flannelette, Canton flannel, or bath toweling, all of which absorb moisture fairly well, but can hardly be very comfortable for the baby. If the cotton bird's eye is too expensive, the best substitute is probably a factory cotton, or four thicknesses of cheese-cloth.
