

CHILDREN

Are always liable to sustain and severe colds, to cough, sneeze, and have their noses running, to be ineffective. Nothing is better adapted for such complaints than Ayer's Cherry Pectoral.

Strangling.

It had nearly ceased to breathe. Realizing that the child's alarming condition had become serious, I immediately resorted to the use of Ayer's Cherry Pectoral.

Ayer's Cherry Pectoral.

DR. J. C. AYER & CO., Lowell, Mass. Sold by all Druggists. Price 25c per bottle.

HARPING ON THE DEBT OF CANADA.

The Telegraph and other opposition newspapers appear to take a great deal of satisfaction in publishing articles on the debt of Canada, for the purpose of proving that Canada is too hopelessly involved, to be well nigh ruined. It appears to us that in thus making a business of the consideration of the debt of Canada, the opposition press is acting most unwisely.

NOTE AND COMMENT. The Telegraph seemingly asks what has become of the proposed recon and correction of the census? As the matter lies in the hands of a competent committee we presume it will not be lost sight of, but will be attended to in due course.

A good deal of surprise is felt at a statement in which the appointment of Mr. James Ferguson as Justice of the Peace is mentioned. It is not surprising that the appointment of a man of such high standing should be made.

For a year or two prior to the death of the late William Henry Smith there were rumors that he was to be elevated to the peerage but his death took place before the arrangement could be carried out. Now it is announced that his wife is to be made a peeress, but the title is given to her. Lady Smith would be a novelty but it would hardly answer.

The Globe says that the weakness of the Imperial Federation scheme is in the defence of the colonies. It appears to the Gazette that this is a strong point of the scheme as a union for the purpose of defence is the kind of union which is likely to be the most lasting, and to command the widest support.

Several literary men in very erratic spirits, and are said to indulge in a little of the same kind of thing. It is not surprising that the appointment of a man of such high standing should be made.

The Globe on Saturday published an absurd letter from Mr. Edward W. Bok on what he describes as exotic literature. Mr. Bok is a person whose one takes seriously because it is well known that he draws on his imagination for his facts, and invents all sorts of statements which he retails as truth.

QUESTIONS.—Yesterday's session of the royal commission was short but of great importance to the people and disaster to the Marier government, who have been driven, apparently, to the wall.

Hon. Mr. Garneau, being cross-examined by Mr. Marier, avowed positively that before he had reported favorably to the council upon the Bale des Chaleurs matter, he had, by means of Dea, Wiman & Co. and Braslert's agencies assured himself that all the gentlemen of the company graduated in question were of the highest principle and standing.

What, therefore, was the position of the witness and the whole episode when Mr. Caegrain produced a telegram from Cooper to Mr. Garneau, giving the latter, for the first time, the names of the men associated with him in the enterprise, and that document was dated 27th April, six days after the order in council was required. It was also discovered that when the department produced the record re Bale des Chaleurs they had withheld the cover or index, and when the latter was dragged out of their drawers important documents were missing, they, however, must be produced.

THE JAMAICA EXHIBITION.

What Canada Showed There and the Result on Our Trade.

On Oct. 18.—The following is a memorandum of trade resulting from the exhibit sent by Canada to the Jamaica exhibition.

Flour—Several of our Canadian millers are making shipments of flour, and the through rate now to the British West Indies being the same as that via New York, the objection of increased cost of carriage is removed. The Canadian flour kept for four months, and produced the best bread that had ever been seen in Jamaica.

Cheese and butter—Better cheese or butter was never seen on the island. There is no doubt the Canadian cheese and butter trade will be Canada's if shippers simply look after it.

Meats—The same excellent report may be said of these goods as of butter and cheese. Messrs Peardon & Co., of Hamilton, are sending regularly their goods to Jamaica now, and alluring from the exhibit they sent to the exhibition.

Outmeal and split peas gave great satisfaction, and to the extent of the demand we are sending them to Jamaica. Lumber—Already one considerable shipment has been sent by Mr. LeMay of Montreal, amounting to a great deal of the lumber consumed in the West Indies comes from Canada through United States dealers.

Carriage—The exhibit of carriages so captivated the people that the Jamaica Carriage Co. and other manufacturers are sending large quantities of carriages, not only to Jamaica but to the other islands. Furniture and other furniture—All the exhibits were sold, and very considerable orders are being sent forward for them.

Books and organs—The exhibits were all sold, and considerable orders were sent to Canada for more. Ready-made clothing—The exhibit of ready-made clothing was a great success. A large quantity of the exhibit was sold, and a great deal of the exhibit was sent to Jamaica since the exhibition as a result of it.

Traded in Jamaica—A large demand and Canada stood well. Orders have been sent in considerable quantity to Canada for goods and other articles. Several repeat orders were sent to Canada.

Locks and hinges—Orders have been sent to Canada for supplies, and in this business could be largely increased. Shoels, ploughs of suitable kind, and agricultural implements of suitable kind, have been sent to Jamaica since the exhibition as a result of it.

Wall paper gave great satisfaction and repeat orders were sent. The above are simply a portion of the many articles of Canadian production for which a demand was shown as a result of the exhibition. There is no doubt that the experiments which have been made since the exhibition by shipments of fruit in large shipments by every steamer.

The oranges, bananas, pineapples, etc., were justly regarded as among the best of the world by the leading houses in Canada, and arrangements have been made for a regular supply of fruit by the Halifax steamer service.

Shipments of coffee that were introduced by the commissioner to Canada gave every satisfaction, and already large orders have gone forward for more. The coffee of the leading planters in Kingston informed the commissioner that his coffee was already for his whole output of coffee from Canada, and it may add that as a result of the exhibition the people of Jamaica have been brought to the knowledge of producing in considerable quantities for export, the articles they can so easily raise in the island, and their attention is now directed to Canada as a market for them.

There was launched at Peake's No. 2 what last evening a well built and handsome water-tight, the property of some of the popular members of the St. G. C. This craft, which measures 15 feet long by about 6 feet wide, is the completed work of the young gentlemen who own her. She is built on the general plan of a calicheira, but for propelling power has been furnished with a large paddle placed in the middle of the craft and worked by pedals, which are placed one on each side of the paddle-box. At 7 o'clock last evening the affair was launched, and great was the joy of her builders when they saw her sit in the water "like a thing of life." The owners then went aboard, and soon the pedal cranks were sending the catamaran through the water at a good speed. After a mile or so had been covered, five other passengers were taken aboard, making eight in all. The behavior of the craft was excellent, and amid the "cheer-cries" of those on board, and the cheers of the spectators on the wharves, a voyage was made down the river—Charlottetown Examiner.

Ald. W. D. Martin, has left at the Transit office a government slip, tied by string to a piece of stick which has lived and blossomed all the summer without being in any earth.—Monica Transcript.
