From Newfoundland, letters were also received advising of the reception and appreciation of the broadcast. One writer from Maine, S. S. A. stated that after searching desperately for clear reception of the broadcast, which was also put on the NBC network, finally picked it up from CNRA. Extensive improvements have been made in this section and a new type of aerial has been installed with the result that the quality has been especially commented upon by many listeners and points never before reached are now receiving the station consistently.

Here and There

WOMEN'S GAWNS HORRIFY GANDHI AT RECEPTION

London, Nov. 23. - Mahatma Gandhi went to a reception yesterday at the home of Lady Astor. Later he disclosed that the gowns of the women guests caused him to lower his eyes in shame. "Even in tropical India where the temperature often reaches 120 degrees, woman never would dream of appearing on the streets half dressed as they do in London", he said. "Western women are mad with their own vanity. They worship the god of fashion. It is sacrilege for them to allow beauty doctors to mar the faces God has given them, to pluck their eyebrows and distort their features."

At Vancouver they will be transferred to the liner to complete the remaining 5,000 miles of their journey at sea. They will be approximately 28 days on the water. These cows are to be used for breeding purposes by the Dairy Ice and Cold Storage Co. of Hong Kong, and to supply high grade milk for the white settlement of that city.

GOOD MARKET FOR CRANBERRIES

Moncton, N. B., Nov. 24th. - There would seem to be a good opportunity for the cultivation of cranberries in the Maritime Provinces, declared F. W. Walsh, Superintendent of Aways, on his arrival here from Agriculture, Canadian National Railways, N. S., where he attended the Maritime Winter Fair in connection with the choosing of a Maritime boys and girls to compete in the cattle judging contests at the Royal Winter Fair in Toronto, Canada, he stated, imports cranberries from the New England States to the value of approximately \$200,000 each year. Each of the Maritime Provinces, he continued, would seem particularly adaptable to the cultivation of cranberries, the plant being native to all three. At the present time there is only a very small output, mostly from Nova Scotia, and this could be materially increased. Cranberries are mostly cultivated on bog lands can be adapted to other lands and in this way, unprofitable lands can be made to add to farm revenues.

SAFEGUARDING HEALTH OF RAILWAY PATRONS
