Introductory.....	1

PART I.—Producer Tests.

Types of gas producers employed in tests.....	7
Up-draft producers.....	7
Down-draft suction producer.....	9
Combined up-draft and down-draft producer.....	10
Double zone producer: both zones operating with up-draft.....	12
Discussion on the combined up-draft and down-draft type of producer.....	14
Destruction of the tarry vapours.....	15
Object of tests.....	18
Method of carrying out tests, and observations thereon.....	19
Determination of the quality of the fuel.....	19
Fuel charged.....	19
Starting and stopping the tests.....	19
Possible errors due to change in fuel contents at the beginning and end of a test in the Westinghouse producer.....	20
Production of gas.....	21
Calibration of gas meter.....	22
Anti-pulsator.....	22
Readings of gas meter.....	23
Quality of the gas.....	23
Determination of tar and ammonia in the offtake gas.....	23
Determination of tar in the purified gas.....	24
Temperatures and pressures.....	25
Water supplied for cleaning and cooling the gas.....	25
Description of the Westinghouse double zone bituminous suction gas producer.....	26
The producer.....	28
Design of the combustion zones.....	29
Purification of the gas.....	33
The washer.....	31
Producer trials.....	34
Tosfield lignite: trials Nos. 38, 39, and 44.....	34
Rosedale coal: trials Nos. 40 and 43.....	36
Gainford coal: trials Nos. 42 and 45.....	37
Cardiff colliery: trial No. 46.....	38
Twin City coal: trial No. 47.....	38
Pembina coal: trial No. 56.....	39
