*If you only want overcoat patterns, cross out the word "suit."
If you only want suitings, cross out "overcoat."

Grain Growers' Guide Coupon No. 2.

A Plain Talk to Men who Read The Grain Growers' Guide

Now is the time when every dollar counts. A dollar saved now means an extra dollar for the wife and children. Or, if you aren't married, a dollar to put by "against a rainy day."

Why, therefore, should you pay a big price for your fall or winter suit and overcoat, when you can buy them from us at about one-half what you would ordinarily pay.

You've heard that clothing is cheaper and better in England, and you certainly know that English fabrics are the finest in the world.

Think, then, of the advantage of securing a suit made of the best English woollens, cut in the latest Canadian, New York, or London style (whichever you prefer), and tailored to your individual measure, delivered to your door all duty and carriage charges prepaid, for only one-half what you would pay if you bought in Canada.

Get our Patterns and be Convinced

Now to prove to you that this is so we will, upon receipt of the above coupon, properly filled out, send you our Style Book, 72 pattern pieces of English suitings, and a letter which explains all about our system of doing business.

When we tell you that in the past six years we have made nearly 10,000 suits for Canadian customers, who are ordering from us year by year, you will realize that we must be giving exceptional value or we couldn't be doing such a big business.

Sit down right now; fill out the coupon above, mail it to us, and we will send you the patterns by return, so that you can judge of the values offered for yourself.

If you don't want to cut this paper, send a post card or letter, asking for suit or overcoat patterns, or both, and we will send them right away. But to get them, you must mention the Grain Growers' Guide.

MAYER'S SURE DEATH GUARANTEED

GOPHER POISON

MADE IN CANADA

EASY TO PREPARE GREEDILY EATEN SURE TO KILL

The modern farmer wisely insures against hail—he should certainly insure against the grain-destroying Gopher.

Mayer's Sure Death Gopher Poison is positively the strongest and surest poison on the market and is guaranteed (money back guarantee) to kill—and kill quickly.

A 50c package will kill 1,000 Gophers. This is a very small investment for a very big job. Ask your dealer or send direct.

What Farmers Ask Me

Continued from Page 44

A.—The custom of the country is, when supplying the seed and paying one-half the threshing bill the owner secures one-half. When the renter supplies everything and pays all the threshing bill the owner secures one-third. As far as I am aware these proportions also hold good in relation to livestock, tho there is not so much of this kind of leasing done as there is in the case of grain farming, and the matter would, in my opinion, be for arrangement between the parties concerned.

Cultivated Grasses For Hay

Q.—In the spring of 1912 I seeded down with Timothy, Western Rye and Brome Grass about two acres; in cutting the same this year find that very little of the Western Rye and Brome Grass is growing while the Timothy is a good stand, or rather catch. I am desirous of sowing some grass to be cut for hay and wish same for cattle fodder. The field I have seeded down being such a poor catch of Brome and Western Rye, I am rather skeptical about seeding down to Brome. I understand from reading that Brome is rather hard to eradicate once it is established. Timothy in this part of the province does not seem to yield well, especially on the high land, tho it does better on the river flat. From what I have read concerning Brome I judge it should be the grass to sow, but supposing the seed matures, in feeding same to cattle and applying the manure to the land in the raw state, would the seed passing thru the animals be likely to infest fields one would not like it to? I have two neighbors who sowed Brome this spring, being the same sample of seed which I used in 1912, the catch to date seems very light, in fact one would not think the land was seeded down at all. Would you, having had experience with Brome, recommend it? My half acre of alfalfa was cut the second time on August 20 and I estimate between ten and eleven hundred pounds from this cutting. I am now feeding a small quantity to the cow and she has increased in her milk flow considerably. The soil for inoculation came from your station.

Wild Horse—Alta.

A.—I would not consider that Brome would be likely to give you any serious trouble, and I believe the advantages of this variety of grass outweigh any disadvantage it may have with regard to its eradication. For any land which you are following a regular rotation and growing spring sown crops, I do not believe that Brome Grass will be found an objectionable variety of grass to grow. It provides early pasture, is nutritious and also lasts well into the fall. If the seed you secure is good, I think you would be able to get as good a start with Brome Grass as you would have been able to do with Timothy. I would think the probability is that judging from the experience of yourself and neighbor with the same seed, that the seed used by you was not vital. I am glad to know that the alfalfa experiment which you are conducting is turning out satisfactorily. I am sure you will be satisfied with the fodder produced from your land seeded with alfalfa, and when any time you break up this land the grain crops grown thereon will be found superior to those grown on land which has not produced alfalfa.

THE TURKEY MARKET

That something should be done by the different poultry associations when they meet during this winter in regard to the turkey market is emphasized in a recent issue of the Farm and Ranch Review.

Christmas Day and Thanksgiving Day provide the chief market for the turkey crop, but with the latter season so uncertain and liable to set in a most inconvenient time—in the middle of harvest, for example—all interest is lost in providing the customary dish for this occasion, and consequently, half of the market for turkeys is destroyed. Surely poultrymen are worthy of as much consideration as other dealers, and since their case is a reasonable one, there is no reason why this matter cannot be given due consideration and publicity to the end that the government will be brought to acced to their requests in this matter.

Deafness

From All Causes, Head Noises and Other Ear Troubles Easily and Permanently Relieved

Thousands who were formerly deaf, now hear distinctly every sound—even whispers do not escape them. Their life of loneliness has ended and all is now joy and sunshine. The impaired or lacking portions of their ear drums have been reinforced by simple little devices, scientifically constructed for that special purpose.

Wilson Common-Sense Ear Drums
often called "Little Wireless Phones for the Ears" are restoring perfect hearing in every condition of deafness or defective hearing from causes such as Catarrhal Deafness, Relaxed or Sunken Drums, Thickened Drums, Roaring and Hissing Sounds, Perforated, Wholly or Partially Destroyed Drums, Discharge from Ears, etc. No matter what the case or how long standing it is, testimonials received show marvelous results. Common-Sense Drums strengthen the nerves of the ears and concentrate the sound waves on one point of the natural drums, thus successfully restoring perfect hearing where medical skill even fails to help. They are made of a soft, sensitized material, comfortable and safe to wear. They are easily adjusted by the wearer and out of sight when worn.

What has done so much for thousands of others will help you. Don't delay. Write today for our FREE 158 page Book on Deafness—giving you full particulars. **WILSON EAR DRUM CO.,** Incorporated LOUISVILLE, KY. 446 Inter-Southern Bldg.

FARMERS!

If you were to buy a suit of clothes to wear around the farm, it would not be a full dress suit as it would not answer your purpose.

The same thing applies to a fire insurance policy. Our policy is constructed by farmers, for farmers, and suits your purpose in every way. The method of paying for your insurance is on the co-operative plan. There are no stock holders to pay, therefore no middleman's profits. See that your next policy is with the
