A canine thief is accused of taking newspapers from several Montreal

zivil war and yet nothing is done ex- the marvel of the world a few years both sides buy in this country to many people refused to believe it make nurchase The natural result of our policy

AN ACTIVE AGRICULTURAL PROGRAM

The Liberals to-day talk much their interest in the farmer. But they end, no matter what the humiliation were in power fifteen years, and their to which it may lead before the troupractical interest during that time was ble is over."

marked by little legislation, while the Agricultural Department, the one department of the Government which comes in touch with the farmer, was actually starved.

One example is the way the Expericipal enterprise. mental Farms were treated under the Laurier regime. (The Experimental Farms, by the way, were started by Sir John Carling, a Conservative Agheartily congratulated. ricultural Minister.) The yearly ap-As a paper in favor of public ownpropriations under the Liberals were ership of city utilities, the Courier the smallest possible to keep the nost heartily endorses the proposed farms going; no expansion work was acquirement. At the same time, the attempted, no new lines taken up, and responsibilities of the proposed step the money expended was not even must not be ignored. The whole subsufficient to keep the farm buildings ject is one which calls for and should and equipment in proper repair. In receive earnest and intelligent consome cases the new Government sideration. The property-holders are found, when it came into power, that virtually asked to become partners in the farm equipment was actually business deal, and it is always the much inferior to that on the average wise and sensible course in such tran-Canadian farm, while the buildings sactions to understand fully what is were almost ready to fall down. involved. There is nothing to be con-

The change in policy is shown by the estimates. For instance, the last year of the Liberal regime there was provided in the public works estimates for experimental farms only \$10,000. The estimates laid on the table this week provide for no less than \$250,000 for the improvement of Experimental Farm buildings and for

new buildings.

For carrying on the Experimental Farms in all their branches there was provided, the last year of the Liberal rule, \$215,000, and this year the estimates contains no less than \$770,000 for similar work. For Experimental Farms altogether the vote, in 1911, was \$225,000, and this year a little

over a million, or, to be exact, \$1,025,-

The increase in appropriations this year are for three main purposes. First, expenditure on new lines and methods of work. Second. expansion

of old lines of work, and, third, money for the purchase of additional stations, erection of new buildings, and

purchase of equipment. A policy of specialization has been porches; yet some makers of dog bis- partment of British Columbia seven carried on in connection with the cuit fail to advertise. work. Three new divisions have re-

tion of fares.
