Our wildflowers are a of promise to justify extensive experigraciously to the contours of the hills, great study, teach them to clasify and and the curving of the shores, winding arrange and write descriptions of these. in and out apparently without purose or The wonderful diversity of insect life situation may very soon induce such world, and until these two faults are direction. But in so small an area there which we see all around us is absorbing trials. The lack of good stokers for war corrected the cattle of the average Am direction. But in so small an area there is little need of Railway directness, and one is glad to loose a little time in travel where there is so much of it in a day. At every turn there is a changing prospect, a new arrangement of sea and shore, of cliff and dell, of lily fields and shore. It is not believed there there is a changing prospect, a new arrangement of sea and shore. It is not believed there that if can be substituted the set of the average American farmer will continue to be surply. The lack of good stokers for war vessels, the expense and storage room of coal make the advantages of liquid fuel appear very great by contrast. The advantages of liquid fuel are now under consideration at Washington. It is not believed there that if can be substituted these truths we do not know. Perhaps no the vessels now in service but shore, of cliff and dell, of lifty helds and oleander hedges. Broken pieces of soft stone spread upon the road-bed at once pack into a smooth surface over which a wheel delights to roll, and its grey tone blends mest hapily with the prevailing in their hands the future men will be fuel are the immense saving in storage mer's institutes and fairs. But wherecolors of the lendscape. And then the raised above the level of mere machines room and weight carried, decrease in over practical, the teaching should be by fences, which generally are objects whose ugliness needs some excuse are here a positive ornament. They are walls constructed of the same sawed-stone blocks structed of the same sawed-stone blocks and cement which are used in all the Island architecture, and they would stand for a century here, where there is no frost to heave them, unless they should chance to be crowded over by should chance to be crowded over by the two careful as to what your children. You cannot this world holds for them. You cannot only a weight of coal. In addition is the absence of smoke, and saving of time and labor in cleaning grates and disposing of ashes. Among the disadvantages are they never know. Employ good cows as your assistant they should chance to be crowded over by this world holds for them. You cannot only and the lack of supply stations for you preach.—Jersey Bulletin—

the roots of some pushing tree. They be too careful as to what your children our war vessels abroad. em to have been built along the roads enerations ago, when slave labor was bundant, standing everywhere square traced directly so many of the erimes of the dangers of explosion might be abundant, standing everywhere square and firm—now as parapets along the brow of some cliffs whose base is beaten by the sea, and again as retaining walls, which are only a recipe for committing the brow of some cutting-usually against the face of some cutting-usually loss of some cutting-usually bare; gray and honeycombed with age, but often draped and garlanded with maurandys and other vines, or overhung by huge masses of cactus. They are always picturesque, and, like all solid, hoary, and weather beaten structures, are agreeably suggestive of antiquity. These, then, are the leading features of the landscape which are permanent; a narrow stretch of land, with often a rolling and rugged surface; bold shores surrounded by a see of unspeakable blue; open fields, with seant coarse grass which leaves them rather brown than green, forests of cedar, with blue-gray for commentative control of the companions of their with each other at every conceivable curve and angle. Over all hangs a translations are constant surface and they of roads in a close net-work, uniting with each other at every conceivable curve and angle. Over all hangs a translations are constant surface, and the possible of the same promised to a careful of the companions of their with each other at every conceivable curve and angle. Over all hangs a translations are constant surface, and the possible of the same promised to a careful of the companions of their with each other at every conceivable curve and angle. A BIT OF NATURE. Mrs. Humphrey read an orignal paper

My mother she's so good to me, Ef I was good as I could be, I couldn't be as good; no sir! Can't any boy be good as her. She loves me when I'm glad or mad She loves me when I'm good or bad; An' what's a funnies thing, she says She loves me when she punishes.

I don't like'her to punish me; That don't hurt, but it hurts to see Her cryin'; nen I cry; an' nen We both cry; and be good again. She loves me when she cuts and sew. My little cloak and Sunday clothes; An' when my pa comes home to tea, She loves him, most as much as me.

She laughs an, tells him all I said, An' grabs me up an' pats my head; An' I hug her, and hug my pa, An' love him purt' nigh much as ma. —J. Whitcomb Riley in the Century.
