Sparta, May 15.—The home of Mr. and Mrs. R. Matthews, Sparta, was the scene of a very pretty event on Saturday, 6th May, it being the occasion of their forty-fifth wedding anniversary, when they were taken quite by surprise by their six daughters and families, namely: Mr. and Mrs. Geo. Stafford and daughter, Miss Versa, Vienna; Mr. and Mrs. Wm. Cowling, Littlewood; Mr. and Mrs. John Page, Dunboyne; Mr. and Mrs. John Page, Dunboyne; Mr. and Mrs. Bernard Baldwin and daughters, Misses Marjorie and Marguerite, Mt. Elgin; Mr. and Mrs. Earl McLean (grandchildren), St. Thomas; and Mr. and Mrs. Harley Garrett, Sparta. An address was read by Mrs. Claude Griffin, while the presentation of two beautiful leather rockers was made by Mrs. Geo. Stafford and Mrs. Wm. Cowling on behalf of the family. After a sumptuous dinner, the afternoon was spent in games and social chit-chat, after which all dispersed to their respective homes, with the wish that Mr. and Mrs. Matthews may be spared to celebrate, at least, the anniversary of their golden wedding.

LAKEVIEW.

Those who remained at home to save their fine feathers from the rain last Sunday missed a fine sermon delivered by Rev. Mr. Bates, of Toronto, who gave an interesting address on Education, contrasting the right lines for educating the young from the wrong, as exemplified by German "kultur," whereby the latter wrought much evil by the present war.

Continued rain and chilly weather will cause scantier crops this season, as many farmers have been unable to prepare the soil in time for seeding.

Thin Blooded People.

Often Become Seriously Ill Before They Realize It.

Some people have a tendency to become thin-blooded just as others have an inherited tendency to rheumatism or nervous disorders. The condition in which the blood becomes so thin that the whole body suffers, comes on so gradually that anyone with a natural disposition in that direction should watch the symptoms carefully. Bloodlessness can be corrected more easily in the earlier stages than later. It begins with a tired feeling that rest does not overcome, the complexion becomes pale, slight exertion produces breathlessness, and headaches and backaches frequently follow. In the treatment of troubles due to thin blood no other medicine has had such a great success as Dr. Williams' Pink Pills. They go right to the root of the trouble, make rich, red blood, thus restoring the weakened system to health and strength. Mr. R. F. Ashford, Peterboro, Ont., says: "Four years ago my condition became so serious that it seemed to me I possessed every pain and ache and every morbid feeling possible. For months I had been overworked, and bereavement added the last straw necessary to break down my constitution. I had a severe ever-present headache and pains in the back of the eyes, and at the same time I was seldom free from severe neuralgic pains. I was rarely hungry, and when I was it seemed to create a morbidness which made my other ills harder to bear. Of course, I consulted a doctor, and he told me a rest and change of air, just the thing I was unable in the circumstances to take. I had a particularly bad spell on the day my daughter returned from college, and she insisted that I should take Dr. Williams' Pink Pills. I was decidedly sceptical, but she got some, and to please her I took them. The result—After the first box I was compelled to admit that I really did feel better. After the second box I ungrudgingly admitted that they were doing me good, and after the sixth box I felt free from every ache and pain, and in gratitude I began to praise the pills to others. I am feeling as fit as I did twenty years ago, and I owe it to Dr. Williams' Pink Pills."

You can get these pills from any medicine dealer or by mail at 50 cents a box, or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

TEST YOUR COWS.

THERE IS MONEY IN IT.

To-day the prudent farmer hardly dreams of planting seed grain without testing it. He realizes there is on deposit in the Bank of Nature a huge sum of money, much of which may be his if elementary rules are followed in seeding and cultivating.

The average dairyman with twenty cows may reasonably expect as his share of nature's hoard a yearly income of two thousand dollars if the resultant crops are marketed through suitable cows. But can the unselected, untested cow be expected to take a prominent part in that annual distribution of nature's wealth? She may be fed and cared for to the best of her owner's ability, but there seems to be a loose end if he does not turn round and test her, determine her ability to turn the vast deposits in nature's bank into a round nine thousand pounds of milk and leave a clear profit if milk fetches 120 per hundred.

Just guessing at seed vitality and power to grow is queer work; guessing at a cow's production and profit is risky and unnecessary. It is very risky because many a dairyman is deceived without the use of scales and test, quite unnecessary because the dairy division at Ottawa supplies, free of charge, milk record forms. Write for them, either the three day per month or the daily kind, with a herd record book. Their use gives certainty. Test your cows—there is money in it.
