AN INFANT SAVED!

Amonth ago a prominent lady in Montreal almost lost her infant child by death. The mother's distress was dreadful, and she seemed powerless to help the little one. It had become pale and emaciated from dysentery; its stomach was weak and seemed to refuse all nourishment.

The physician in attendance advised a trial of Lactated Food. Small quantities were administered for the first two or three days, from which the infant derived strength and vitality. The food was continued, and in three weeks' time the child was perfectly healthy.

Lactated Food saved the little life; without it death would have resulted. This experience should be a warning to all mothers who have delicate infants. The ordinary cow's milk, and the poorly-prepared artificial foods are never tolerated on the weak stomach. It require a food in every respect like mother's milk—a food autied for weak and impaired digestion.

Infants who are fed on Lactated Food are never same single years like help.

Infants who are fed on Lactated Food are

never sick; they pass safely every ill which surrounds them, and fast increase in flesh bone and muscle. Try it, mothers. Should you suffer from toothache try Gibbons' Toothache Gum. zxv
