

LLOYD'S CANADIAN PATENT PLOUGH.—No. 4.

THE Subscriber begs to inform the Canadian Farmer's in general, that he has constantly on hand an extensive stock of LLOYD'S CANADIAN IMPROVED PATENT PLOUGHS, which are manufactured under the immediate inspection of the inventor, Mr. Lloyd; and which have given general satisfaction in every portion of the Province, where they have been used. It is the opinion of a number of the best ploughmen in the Home District, that Lloyd's Improved Ploughs will ultimately supersede the Scotch Wooden Ploughs, on account of their cheapness and durability. In every section of the Province where the various patterns of the common Patent Plough are in use, the agriculturists in those localities, will find it tend greatly to their interests to purchase "Lloyd's No. 4 Patent Plough," as it is acknowledged on all hands to be an admirable implement for ploughing a ward, or any other description of work. The mould board, wrought iron, and wood work, are very similar to the most approved Scotch Plough, and the shears are hardened in such a manner, that they will wear much longer than wrought-iron laid with steel.

The above Ploughs will be supplied to order, at either wholesale or retail, on very reasonable terms.

REVOLVING DRYING KILN.

THE Subscriber begs to inform the Millers, Merchants, and the Public generally, that he has, at considerable labor and expense, invented and completed a Machine for DRYING Wheat, Oats, Barley, Indian Corn, or any other Grain necessary to be dried before being manufactured: and he assures them, that it is the cheapest and most expeditious mode of Kiln Drying Grain now in use. This Machine will dry from thirty to sixty bushels of grain per hour in a most perfect manner. It is so constructed, that the grain passes through the machine, from thence to the rolling screen, where it is cooled, in a fit state for manufacturing. This machine requires very little power to keep it in motion, and may be driven by a small strap from any wheel in the mill. A quarter of a cord of hardwood will produce heat sufficient for drying a thousand bushels of grain.

The Subscriber begs to inform the public, that he has obtained a Patent for his Machine, which extends through the United Province of Canada, and that he is prepared to manufacture the above Machines to order, or dispose of the right to persons desirous of manufacturing or using the same.

Any further information on the subject may be had, by addressing the Subscriber. All communications (post-paid) will be immediately replied to.
