world. When he was more than sixty years of age, he turned his attention to poetry, and dedicated his verses to George Herbert.

If you will read these verses you will say that the author of "Lear"

and "Hamlet" did not write them.

Bacon dedicated his work on the Advancement of Learning, Divine and Human, to James I., and in his dedication he stated that there had not been since the time of Christ, any king or monarch so learned in all erudition, divine or human. He placed James the First before Marcus Aurelius and all other kings and emperors since Christ, and concluded by saying that James the First had "the power and fortune of a king, the illumination of a priest, the learning and universality of a philosopher." This was written of James the First, described by Macaular as a "stammering, slobbering, trembling coward, whose writings were deformed by the grossest and vilest superstitions—witches being the special objects of his fear, his hatred, and his persecution."

It seems to have been taken for granted that, if Shakespeare was not

the author of the great dramas, Lord Bacon must have been.

It has been claimed that Bacon was the greatest philosopher of his time. And yet in reading his works we find that there was in his mind a strange mingling of foolishness and philosophy. He takes pains to tell us, and to write it down for the benefit of posterity, that "snow's colder than water, because it hath more spirit in it, and that quicksilve is the coldest of all metals, because it is the fullest of spirit."

He stated that he hardly believed that you could contract air by putting opium on top of the weather glass, and gave the following

reasons:

"I conceive that opium and the like make spirits fly rather by malignity than by cold."

This great philosopher gave the following recipe for staunching blood

"Thrust the part that bleedeth into the body of a capon, new ripped and bleeding. This will staunch the blood. The blood it seemeth sucking and drawing up by similitude of substance the blood it meeted with, and so itself going back."

The philosopher also records this important fact:

"Divers witches among heathen and Christians have fed upon main flesh to aid, as it seemeth, their imagination with high and foul vapors"

Lord Bacon was not only a philosopher, but he was a biologist, as appear from the following:

"As for living creatures, it is certain that their vital spirits are a sub
