CATARH.

A New Home Treatment for the Cure of Catarrh, Catarrhal Deafness, and Hay Fever.

The microscope has proved that these diseases are contagious, and that they are due to the presence of living parasites in the lining membrane of the upper air passages and ostachian tubes. The eminent scientists—Tyn-dall, Huxley and Beale—endorse this, and these authorities cannot be disputed. The regular method of treating these diseases is to apply an irritant remedy weekly and even daily, thus keeping the delicate membrane in a constant state of irritation, accompanied by violent sneezing, allowing it no chance to heal and as a natural consequence of such treatment not one permanent cure has ever been recorded. It is an absolute fact that these diseases cannot be cured by an application made oftener than once in two weeks, for the membrane must get a chance to heal before any application is repeated. It is now seven years since Mr. Dixon discovered the parasite in catarrh and formulated his new treatment, and since then his remedy has become a household word in every country where the English language is spoken. Cures effected by him seven years ago are cures still, there having been no return of the disease. So high are these remedies valued, and so great is the demand for them, that ignorant imitators have started up everywhere, pretending to destroy a parasite—of which they know nothing—by remedies the results of the application of which they are equally ignorant. Mr. Dixon's remedy is applied only once in two weeks, and from one to three applications effect a permanent cure in the most aggravated cases. N.B.—For catarrhal troubles peculiar to females this remedy is a specific. Mr. Dixon sends a pamphlet describing his new treatment on the receipt of ten cents in stamps. The address is A. H. Dixon & Son, 303 King Street West, Toronto, Canada.—Scientific American.

Sufferers from catarrhal troubles should carefully read the above.

A wholesale provision merchant writes in reference to your Carbolic Smoke Ball and Debellator treatment, I consider them a boon to suffering humanity. Yours, etc., JAS. DICKSON & Co., West Market St., City.

Mr. G. K. Bentley, Artist, 81 King St. East writes:—We have used the Smoke Ball treatment in our family for the last year, and consider it a valuable remedy for Catarrh. Very respectfully, G. K. BENTLEY.

BOILED ONIONS.—After taking of the outer skin let them soak in cold water for a couple of hours, or longer if you like them mild; let them be cooked in boiling water, which should be pretty strongly salted, drain off the water as soon as they are almost done, then let them simmer in milk until quite tender; add a good bit of butter, pepper and salt.

Changing its Title. The well-known firm of Oliver Ditson & Co., music publishers, will hereafter be known as Oliver Ditson Company. Mr. Charles H. Ditson, in the new corporation, represents the name so familiar to every newspaper reader. The firm includes Mr. John C. Haynes and Charles H. Ditson (former partners), and five gentlemen who have hitherto held prominent positions in the Boston, New York and Philadelphia stores. The successful firm enters on the second half century of its existence with a large stock and extensive business, and with every probability of large and rapid increase.

The patient will often prefer this ice-cold to hot.
