MONTREAL, June, 1868.

3-6mo

likely that this result might not take place,
but on this point we are not certain.

Botanist.—**SKELETON LEAVES.**—The plan
proposed by Church some years ago yields
fine specimens, and will answer your purpose
perfectly. Boil the leaves for two or three
minutes, then immerse in a strong solution of
permanganate of potash for two hours, ap-
plying a gentle heat, at the end of this
time the laxer tissue can be easily picked off
or removed with a soft tooth-brush. The
skeletons may be bleached by a solution of
chloride of lime or sulphurous acid.

If the fingers should become stained with
the permanganate solution it may be re-
moved by washing with dilute sulphuric acid.

R. W.—**TURNISHED SILVER** is cleaned by
washing with a strong solution of cyanide of
potassium; as soon as the color is restored
the articles must be well washed with water.

H. J., Toronto.—**CRYSTALLINE POMADE.**—
The particular art in making this preparation
is to give time for the spermaceti to assume
large crystals in cooling. The pots into
which it is poured should be warm, and
should cool very slowly, the slower the better.
The following mixture will answer well :—
Ol. Amygdala dulc, 5 parts; Cetaceum, 1
part. Perfume according to taste.

Queen Street.—**PIL COCHIA :**

Take of Aloe Capen.

- Aloe Sicut :
- Gambogia aa..... 4 oz
- Pulv. Colocynth..... 3 oz
- Sapo Hisp..... 2 oz
- Potas Sulph..... 1 oz
- Ol Caryoph..... ½ oz

Make a mass and divide into 5 grain pills.

We append the form for bed bug poison :

- Hydrarg: Bichlor..... 4 oz.
- Ol Lini..... 1 pint.
- Ol Terebinth..... 1 "
- Alcohol..... 4 "

J. M. L., Port Rowan.—We agree with you
regarding the desirability of a general act,
but it will have to come through the legiti-
mate channel, and may be a long time in
doing so. You labor under a misapprehension
as to the Pharmacy Act, and possibly through
the term "discharged" being applied to it in
the public prints. It has been read a first
time, and on the next meeting of Parliament
will be proceeded with without delay.

R. H. Appleton, Stratford.—We will for-
ward the missing June number, and presume
that your not receiving that issue is owing
to the Post Office, as our mailing is done with
all possible care.

Subscriber.—The article termed **QUININE
ALE** may be made by dissolving one grain of
sulphate of quinine in an imperial pint of
bitter ale (about six and a half grains to the
wine gallon).
