

Ruppertsberg Tunnel, 1 mile long, constructed by the German Government, waterproofed with Ceresit. (This is only one of the many tunnels which have been waterproofed with our material.)

CERESIT

is a milky paste which is simply added to the water used in mixing concrete and mortar. With the water Ceresit penetrates to all parts of the concrete and mortar and assures a permanent water and damp-proof job.

No expert help required; no scientific and expensive mixing.

CERESIT is not an experiment, but has been used with complete success on hundreds of tanks, pits, foundations, dams and bridges. It has been employed by practically all Governments in the civilized world. **MORE THAN 5,000,000 CUBIC FEET** of concrete and mortar have been waterproofed with CERESIT in 1909. The use of

Ceresit is complete insurance against the penetration of moisture or dampness, even under a pressure of more than 70 pounds per square inch.

Ask for our free book. It is money in your pocket to know all about this excellent material.
