TWENTY-SEVENTH YEAR

Senator Lovitt Arrested For Yarmouth Bank Smash

As President of Defunct Institu-
tion is Charged With Making
False Returns—Vice-President
Also Accused.

Yarmouth, N. S., Aug. 20.—(Special.)—Hon. Senator John Lovitt of Yarmouth, the president of the defunct Bank of Yarmouth, and S. A. Crowell, its vice-president, were arrested to-day under a charge laid by J. Lyons Hatfield, of making wilfully false and deceptive returns to the finance department regarding the affairs of the bank.

Charles P. Pelton, J.P., before whom they were brought, adjourned the preliminary examination to next Thursday and admitted the senator and Mr. Crowell to bail pending the examination.

Less than two years ago the Bank of Yarmouth closed its doors, and later, when the bank was wound up, the shareholders had to endure a loss, not only of the amount of their stocks but they had to pay under the double liability law. This brought financial ruin to many Yarmouth people.

Following the failure of the bank, the cashier, D. W. Johns, was arrested, and a year ago was tried on a charge of furnishing wilfully false returns to the government under the Banking Act.

NOT SO BAD AS REPORTED QUAKES CEASE; FIRES OUT

Impossible to Estimate Number of
Dead, But Whole of Chili May
Yield a Thousand.

The earthquakes in Chili have ceased and the resultant fires are out and the authorities and people of the two cities, Valparaiso and Santiago, are taking organized steps to relieve suffering for the wounded and bury the dead. The period of sorrow has entered.

Despatches received from Chili yesterday tended to show that the first estimate of casualties and material damage had been greatly exaggerated and that the people of Valparaiso are becoming calmer. The fear of further shocks has been removed by the statement issued from the observatory and to-day it became possible for the first time to organize relief work, beginning a systematic search of the ruins for the dead, and care for the injured.

The government is putting down pillage wherever it breaks out, with troops.

It is still impossible to reach any correct estimate of the dead and wounded. The reports from Chili are most conflicting. A large section of the country, however, visited by the catastrophe of last Thursday, and cabied estimates of casualties refer to some instances to particular localities. Notably Valparaiso, and in others evidently to the entire district which suffered from the shock. The number of dead in Valparaiso, doubtless will run into the hundreds, and for the entire country probably into the thousands. The property damage is estimated from \$200,000,000 to \$300,000,000. Relief is being organized with system and the government has taken complete control of the situation. The foreign legations are active in relief measures as are private persons, and the greatest energy is being devoted in getting supplies for the destitute.

Chili will ask congress for money for the reconstruction of Valparaiso. The fires are under control or extinguished and the shocks have ceased. The people are engaged in seeking relatives and friends, in erecting or perfecting temporary outdoor quarters, against the cold, in getting food supplies and helping each other. Food and water are both most scarce and at this juncture many merchants have made material advances in the price of provisions.

BANDERA STARTS A REVOLUTION HAS TWENTY MEN AS NUCLEUS

Negro Who Distinguished Himself in Spanish War of Independence Leads Revolt Against Palma.

Havana, Aug. 20.—An insurrection began last night in Havana Province, when Gen. Quintin Bandera, the negro, who distinguished himself in the war for independence, left Arroyo Arenas, twelve miles west of Havana, with a force estimated at over twenty men, which, it is believed, was largely augmented to-day by a band armed with guns and ammunition, which set out from Havana.

Gen. Bandera was the first man who crossed the Spanish troops, which shut off the Province of Pinar del Rio from Havana Province. The government admits that Bandera has taken up arms, fifty rural guards from Havana and 100 from Santa Clara. They were sent to Pinar del Rio to-day.

Gen. Rodriguez, commander of the rural guards, admits that the rural

NEARLY A BILLION.

According to a statement issued to-day, congress at its last session, appropriated for the fiscal year, 1907, nearly a billion dollars.

The exact amount is \$79,589,185.16, representing an increase of \$29,404,850.20 over the sum appropriated the last session of the 58th congress for 1906.

Of the net increase it is estimated that \$47,801.08 was for the Isthmian Canal.

SCIENTISTS MAKE SCENE AT INQUEST ON A VICTIM

Investigation of Death of A. N. Randlett of Lowell, Mass., Resumed at Peterboro.

Peterboro, Aug. 20.—(Special.)—The coroner's jury to-night resumed the inquest in connection with the death of Arthur N. Randlett of Lowell, Mass., who died at the home of R. J. Todd, Christian Science demonstrator, last Thursday evening. Evidence was given by Todd and his wife and a couple of witnesses, who, it was thought, could throw light on the matter. The inquest was not completed, and will be resumed on Sept. 10.

The inquest was a somewhat stormy one, frequent altercations taking place between the coroner, the crown attorney and Mr. Todd, when the latter was giving his evidence. Todd was almost vehement in his defence of the principles of Christian Science. Many of those in attendance at the inquest were Christian Scientists, and several times broke into applause at the statements of their leader. There was a scene of disorder in the courtroom at one time. Great interest centres in the case here.

CHINESE BUY "COLONIST" TO SUPPORT THE OPEN DOOR

Rumor That B. C.'s Pioneer Paper Will Start Campaign for Free Coolie Labor.

Victoria, B.C., Aug. 20.—(Special.)—A curious speculation with respect to the reconstruction of The Colonist is being widely circulated in business and political circles. The allegation is that the controlling interest in British Columbia's pioneer newspaper, now held by J. S. H. Matson, is in reality the property of two wealthy Chinese residents, Loo Gee Wing and Lee Mong Kow.

It is seldom that an important newspaper transfer is hedged about with such secrecy as that maintained as to The Colonist's new owners. The numerous Victorians, who believe the report that Chinese have purchased the paper, say that it is for the purpose of supporting an aggressive campaign for the reduction or abolition of the \$300 capita tax to enable the wealthy Chinese contractors to bring in an army of coolie labor for use in the province. The latter is "hot stuff." This year's exhibition is going to be a record breaker. Don't miss it!

BELL FRANCHISE STANDS.

Not Enough Members of Council to Pass Bylaw.

Ottawa, Aug. 20.—(Special.)—The by-law to grant a conditional five years' extension of its franchise to the Bell Telephone Company came before the city council for its second reading last night, but was not acted upon. By the bylaws of the council the granting of an exclusive franchise or a monopoly requires a two-thirds vote of the total membership of council. The required number was not in attendance.

RECORD IN SPARROWS.

Whitby, Aug. 20.—(Special.)—James Robb of this town is a great marksman. The other day he killed eleven sparrows with one discharge of his shotgun. This is a record.

CONVENTION OPENS TO-DAY OBJECT WAS

Compulsory Medical Inspection of School Children to Be Discussed.

"Members are specially invited to wear academic costume and uniform at the functions."

This is symbolic of the quality of mind and the depth and profundity of the subjects that will be occupied with them at the meetings of the British Medical Association which opens to-day, and is by way of a gentle hint to the lady that the proceedings are not specially adapted to unacademic persons. At the convention hall, which seats 2000, there will be several opportunities to hear the great lights of medical science talk intelligently to the public on topics that concern them. The order paper contains the notice that speeches to-day must not exceed 10 minutes each, and papers are limited to 15 minutes. This is one of the achievements of science. Toronto's own Dr. Reeve will be inducted to the presidency, from which Dr. Franklin will retire in a valedictory address. The Lieutenant-governor, the mayor and others will take part in the ceremonies. At 8.30 in the evening Dr. W. S. A. Guthrie will give his address on "Teaching of Obstetrics," and during the day the several sections, of which there are thirteen, will hold sessions. Most of these open at 9.30 in the morning. Sir Thomas Barlow, Bart., delivers his presidential address in the afternoon.

Dr. George Cooper Franklin, F.R.C.S., president of the British Medical Association, was "awfully hot" yesterday. It was physically, and not mentally, however, and everybody could sympathize with him. Dr. Franklin is a most affable English gentleman, of the type familiar to readers of Punch, thru the representations of solid and worthy members of parliament, by E. T. Reed. The start of the past had a very large record-breaking attendance at the meeting, and anticipated much good in the general education of the members by interchange of views.

"We want to get acquainted with your Canadian methods," he said, and his attitude indicated that he was listening to something worth listening to. Among the subjects he expected to discuss public interest was the compulsory medical inspection of school children. He is a member of the political committee of the association, and in that capacity he had been invited to the government of this subject, and also with regard to the fixity of tenure of medical health officers. He had found the government most sympathetic. The difficulty in the cities and municipalities was over the cost. It is quite clear that the government is not prepared to give a free hand, and not to be at the mercy of boards or councils which visit their strict attention to the duties of the health officer. Dr. Franklin is staying with Dr. A. J. Johnson, an old friend of thirty-five years' standing.

Dr. Henry Barnes, president of the association in 1896, is the guest of John Ross Robertson, Sherbourne-street. Dr. Barnes is an F.R.S., and was honored with the degree of LL.D. by McGill University. He belongs to Carlisle, and full of the history of that ancient burgh, who is the president of the Canadian last year to decline the presidencies of the various sections in

FROM HERE AND THERE—FROM EVERYWHERE—THEY COME.

Graded Staff is Needed For Hospital of Future

Dr. Barker Speaks of System of Upper and Lower Houses to Give Opportunity For Continued Training.

"Is the sort of training we have got going to continue to be the best?" was the question Dr. Barker of Johns Hopkins University asked the house surgeons at the General Hospital yesterday. Had the sort hitherto existing been sufficient and was it sufficient for the future? No organization, he said, and new kinds of hospitals needed new organization. A message came into the future would indicate the kind of work house surgeons would have to do, and it was clear, thought Dr. Barker, that the old hospital organization was passing. The staff of the future would be a graded staff with new kinds of men, not only, but a whole group of men, properly subordinated, could handle modern medicine. There might be a proper, but no man would try to deal with the whole field. Modern medicine required more intensive and less extensive work.

Dr. Barker declared that not in one hour could he do justice to the subject. He required a long probation, and the study of one subject after another. Three or four associates with a group of assistants would thus lead to the graded staff, consisting of two sets, the upper house staff with new kinds of men, and the lower house staff with one or two years' experience. From the lower house staff men would be promoted to the upper house, and from these would be chosen assistants to the professors. Such an organization, he thought, would do much for medicine and surgery. There might be a chief surgeon in ten departments, if there were money enough to permit it. They would need salaries, to enable them to give half their time to the hospital and the other half to private practice. The lower men need not be so salaried, as the opportunities they could have would be sufficient reward. Students would then do what the house surgeons had to do at present. They would get that work in their third or fourth year, and be superintended by the house officers. Thus the house officers engaged in the work. This being the truth, it was right the truth should be told.

Mr. Whitney referred to the importance of the work as it affected Canada, which he described as the great auxiliary nation of the British empire. Dr. Pyne accompanied Premier Whitney on his visit to Crew and Bath.

WHY WHITNEY FAVORS ARMY

Believes in Good Influences and Its Immigration Scheme.

(Canadian Associated Press Cable.) London, Aug. 20.—Hon. J. P. Whitney, premier of Ontario, speaking at Bath, gave two reasons why he supported the Salvation Army, both in his individual and representative position. First, he believed in the good influences of the Army; second, because in his emigration work, instead of dumping them down in docks the Army saw them straight into situations. The Army had a smaller percentage of failures than any other organization engaged in the work. This being the truth, it was right the truth should be told.

Mr. Whitney referred to the importance of the work as it affected Canada, which he described as the great auxiliary nation of the British empire. Dr. Pyne accompanied Premier Whitney on his visit to Crew and Bath.

DIES WHILE CHATTING.

St. Thomas, Aug. 20.—(Special.)—James Patterson, aged 50 years, of Rodney, was chatting with friends on his brother's lawn last evening, when he suddenly thrust up his hands and died instantly. Heart trouble is supposed to be the cause of death.

WALKED INTO HOLE; DROWNED.

Hastings, Aug. 20.—James Clarke, aged 18 years, son of Councilor Geo. Clarke, of Alnwick Township, was drowned while in bathing in Rice Lake yesterday.

With others he was walking in shallow water on a sandbar. Coming to the end of the bar, he dropped into a hole only 12 feet deep and never appeared again.

The body was taken out about an hour afterwards.

INFANT KILLED IN RUNAWAY.

London, Aug. 20.—The infant daughter of Mr. and Mrs. Charles Odell of Inkerman-street, was killed and Mrs. Odell seriously injured while driving from Inverness Saturday afternoon. They were being driven to the home of friends when the horses ran away and all the occupants of the rig were thrown out.

WELCOME

TOWN ALMOST WIPED OUT BY FOREST FIRES IN N.B.

Report That Seventy Buildings in Campbellton Are Burned and Many People Homeless.

Campbellton, N. B., Aug. 20.—(Special.)—Forest fires are doing considerable damage in this vicinity and the air is thick with smoke.

It is reported that the Village of Caplan, in the County of Bonaventure, about 70 miles from Campbellton, with another settlement just back of it, have been wiped almost out of existence. Very meagre particulars are to hand, but it is said about seventy buildings have been destroyed and a large number of persons rendered homeless.

The damage to crops and timber lands in that vicinity is heavy and the fire is still spreading.

Another fire is still spreading near Alnwick, but so far as can be learned it has not reached the settlement. The damage to lumber land is considerable.

Still another fire is burning and spreading rapidly just back of Campbellton near the Sugar Loaf Mountains. The flames can be seen leaping up the side of the mountain in two or three places. Unless there is a heavy fall of rain shortly much valuable timber land will be lost in what is called the "burning of the mountains."

The thermometer registered 96 in the shade here to-day.

WILL BE INVESTIGATED.

Midnight Attack on Hebrew Resident at Long Branch.

Shortly after midnight on Sunday a crowd of about 20 surrounded and stoned the residence at Long Branch of Chas. Garfunkel, steamship agent of Queen-street, city. A wagon was used to carry the missiles. No cause for the attack is known. Garfunkel has lived there only about a week.

Acting Deputy Attorney-General Dymond says the matter will be promptly investigated, and the perpetrators of the outrage dealt with just as rigorously as the law will permit.

Speaking of crime in the province in general, Mr. Dymond said yesterday that the month of August was frequently marked by many crimes, and such as, particularly, the case this month. The cause was one for psychologists to determine, but he was of the opinion that the excessive heat this month had something to do with it.

Inspector Rogers is now at Owen Sound on the Jones case.

STORM BREAKS O'ER OTTAWA STOPS MILITARY REVIEW

Entertainment of Massachusetts Volunteers Interrupted—Local Shots Win.

Ottawa, Aug. 20.—(Special.)—A heavy thunderstorm broke over Ottawa to-day and so heavy was the flood which accompanied it that the projected review of the Ottawa garrison and the 5th Massachusetts volunteer militia, now visiting the capital, was abandoned.

Before the storm came the officers of the 43rd D.C.O.R. had a rifle shooting match with the officers of the 5th Massachusetts over the 200 yards range at Rockcliffe, and the local shots won by 222 to 214.

The American consul-general, J. G. Foster, entertained the American officers at luncheon to-day. The visitors, by a late arrangement, will not leave the city until 9 o'clock to-morrow morning.

The Ottawa police are loud in their praise of the orderly conduct of the visiting soldiers. No disturbance, not even loud talking, has occurred, and the Americans have left a lasting impression on the city's guardians of the peace.

CATHOLIC CHURCH STRUCK.

Cornwall, Aug. 20.—(Special.)—During a heavy thunderstorm this afternoon lightning struck the Church of the Nativity (Roman Catholic), East Cornwall, just where the bell tower entered the edifice is not apparent on the outside, but inside, a couple of large pictures and stations of the cross were knocked down, and two sections of plaster about six feet in diameter, were torn from the walls, leaving the wood-work exposed. Fortunately, no one was hurt. Lightning struck poles and trees in several other places, but did little damage.

FIVE CENTS A MILE HERE.

It Costs You That on Ottawa Line If You Don't Buy Tickets.

Ottawa, Aug. 20.—(Special.)—The campaign of The World for two-cent-a-mile passenger rate on electric roads has been watched with interest in this thriving town.

The Ottawa Street Railway gives five tickets for 25 cents, but if a single fare is paid on board, the passenger has to go up town from the G.R.R. station, a distance of less than two miles.

The townfolk are not particularly hurt by this scheme of the railway, but the transient visitor is hit in a most discriminating manner. The townfolk buy five tickets for a quarter and survive, but the transient cuts a big hole in a quarter and only get up town and back again.

The fare should be but five cents, either way, and then it would be over the two-cent-a-mile rate.

IT IS UP TO THE COLONEL.

To Ask the King's Horse to take a seat alongside of him on the Bench.
