India cable states prospects are for an enormous crop of wheat in the Punjab, but the crop is seriously scarce owing to the plague of locusts. The government is importing machinery, thereby hoping to prevent a recurrence of the famine year, when it will be remembered, the crop failed for want of rain. Crop area in the Punjab last year amounted to 1,771,200 acres, with crop 2,400,000 bushels, which was 3 1/2 per cent. smaller than 1904-5.
