LAST TRIP OF SEASON.

BIG EXPORT TRADE

Upturn Becomes Decided on News of Heavy European Buying.

CLOSES MUCH HIGHER

Market Ends With Prices Ser eral Points Above Opening Level.

Chicago, Dec. 22.—Assertions that export business today was on a large scale and that European acquisitions yester-day had been double the amount which had been currently estimated were chiefly responsible for a decided upturn today in the price of wheat. Closing quotations were strong, 2½ to 4% net higher, with May at \$1.67% and July at \$1.38%. Other staples, too, snowed gains-corr % to 1%c, oats % to 1c and provision.

% to 1%c, oats % to 1c and provisions 5 to 35c.

Peace uncertainties made the wheat trade nervous during the first hour or so, opmons being greatly at variance as to how the news at hand from London, washington and other capitals should be interpreted. The puzzle served to keep the market rapidity fluctuating meanwhile within 1% of yesterday's latest figures. Then advices were circulated that the British commassion was again in the lattice as an active buyer of wheat. A decay te advince in years then regard that was accelerated by gossap that a big fleet of steamers would soon arrive at eastern seaboards to relieve the existing freight congestion there. Despite reactions, due to profit-taking, the upturn gained in force right to the close.

Rumors that a warlike note from the emtente allies to the central powers was forthcoming did a good deal to increase buillish sentiment near the end of the session, when shorts were evening up for the three holidays ahead beginning tomorrow. It was not until after the close that many traders were aware of the foundation of the rumors; a Petrograd despatch available early in the morning, and to the effect that formal answer to the German offer of a peace conference would be as already outlined by government officials before the Russian duma. In corn, as in wheat, trade was not heavy, but the market displayed considerable firmness after an easy start. Scarcity of rural offerings helped to a material extent to harden prices.

Oats followed closely the movements of other cereals. Speculative shorts were the chief buyers.

Provisions were neglected. Higher quotations on hogs formed the main basis of strength.

HEAVY TRADING IN PORCUPINE IMPERIAL

-Property Being De-

veloped.

concert hall or picture show, very cheap Good Demand for Ophir Stock POLSON IRON WORKS

R. E. Kemerer & Co. in their weekone of the issues which were most heavily traded in during the past week was Porcupine Imperial which advanced to a price of over 6 cents per chare. share. Various rumors have been cur-rent regarding some new arrange-ment of the affairs of the company which would permit of the reopening which would permit of the reopening and operating of the property, but no authoritative information is obtainable. Certainly some reorganization must be accomplished before the company will be in a position to develop its property but should such reorganization be accomplished the reorganization be accomplished the reorganization be accomplished the recording testion. ization be accomplished the property should have a good chance. The holdings of the company lie on the boundary of Deloro and Tisdale townships and the development work which was accomplished some years ago proved the existence of several veins of prom-ise. Tho the main shaft is down about 100 feet and some lateral work has been done it cannot be said that the extent of the values of the property have been proven.
On Ophir they say: The shares of the Ophir Company have been remarkably steady at a price around 12 that present shareholders are well contented with the progress being made at the property. Should commercial ore be found in quamtity in the vein on the 425 foot level which is now being opened up, the means that the progress being mercial ore be found in quamtity in the vein on the 425 foot level which is now being opened up, the means the should be a s now being opened up, the stock hould have a smart advance. In the latter connection it is well to bear in mind that there is but a compara-tively small number of Ophir shares on the market, the company having an authorized capitalization of 1,000,-000 shares, par value \$1. of 685,000 shares are outstanding and of the latter amount Great Northern owns 155,000 shares. The vein enountered in the crosscut which

to the Ophir property has widened out to 14 inches and is highly mineralized. The crosscut should be in Ophir territory within a short time. Man Meets Almost Instant

being driven from the People's shaft

Death When Caught in Elevator When caught in the cog wheels of appoint a commission to take over and Bloor streets, yesterday afternoon, and operate the lines of the Grand Fred Pennock, aged 40 years, of 5 an elevator at Milne's coal yard, Pertin Ernest avenue, was almost instantly killed. A doctor was called but could gram stating the seriousness of the do nothing. The police were notified. morgue. It is probable that an inquest will be held.

GRAND TRUNK RAILWAY SYSTEM

H. A. Harrington, secretary of the coal men's section, stated that there were a thousand cars tied up at Black Travelers from Toronto to Chicago via Grand Trank comment favorably on the excellent service of the International Limiked, "Canada's Train of Superior Service," operating daily hest tween these cities. Leaving Toronto 6 p.m. daily a traveler is placed in Chicago at 8.05 the following morning, traveling via double-track route, which is conducive to safety, and reducing delays to a minimum with the maximum lays to a minimum with the maximum of the same conductive to safety, and reducing delays to a minimum with the maximum of the same conductive to safety, and reducing delays to a minimum with the maximum of the same conductive to safety, and reducing delays to a minimum with the maximum of the same conductive to safety, and reducing delays to a minimum with the maximum of the same conductive safety. State the same conductive safety is safety to \$12 to \$12; culls, \$8 to \$2.50 common safety. State conductive safety is safety to safety Rock. The New York Central, he said, had declared an embargo and will draw no more coal from the mines till the congestion at Black Rock has "It is nothing but inefficiency on the part of the Grand Trunk," he de-clared. "Those in charge of the Grand Trunk cars say they haven't engines move the coal, yet if they cut out the pleasure trains they are running to meet competition with other lines through from Toronto, and unsurpass-ed dining car service, are offered to during the holiday, they would have 30 or 40 engines they could put to drawing the coal away from Black

The steamer Macassa made its last trip of the year from Hamilton to Toronto and is fiel up now in the Toronto harbor until the opening of natigation next spring. The boat was in charge of Captain Henderson, and heavily loaded with freight, made the trip to Toronto in three hours.

The insurance on inland marine expired at midnight last night, so it is not likely any more boats will arrive in harbor.

Winnipeg, Dec. 22.—Wheat closed 1% higher for December and 1c higher fo May. Oats gained 2c in December an %c in May. Barley was 1c higher. Fla gained 3%c in December and 2%c i Oats were up %c and %c for the week.
Barley was up 5c and 3c: in flax 5%c for the week.
The holiday tomorrow and Monday, with the lack of sensational news, made a nervous market today. The chief business was the evening-up, and when the market closed only a few of the big interests were on either side of the market. The market gained strength late in the day from American markets, and from a belated short covering.

The cash market was a quiet, holiday one, without much change in premiums. Wheat—Open High. Low. Close. December ... 168 169% 167% 171% 174% Oats—December ... 551% 581% 563% 584% Flax—

STOCKS REBOUND FROM BIG SLUMP

Rallies of Three to Ten Points Mark Active Issues.

TOTAL SALES LARGE

Improvement Begins at Outset, Owing to Overnight Developments.

New York, Dec. 22.—Railies of 3 to 10 points in active stocks, with 18 for Gulf States Steel and 26 for Bethlehem Steel, denoted the extent of today's rebound of prices from the hysteria of the preceding session. At the high levels many stocks showed full recovery from their reversal of that memorable period and others registered actual gains over final prices of the mid-week.

Improvement began at the outset, overnight developments affecting the international situation being a potent factor. The advance was partially distributed among standard shares no less than speculative issues and the shorts covered with far more alacrity than they had sold. Investment buying of the character which waits for such opportunities as yesterday's market offered, also helped by their steady buying, to bring about a speedy readjustment.

Realizing sales to effect quick profits and occasional but very cautious short selling caused reactions of 1 to 3 points before midday, but these were more than regained in the final hour, when the general average of prices was highst. Total sales aggregated 1.775.000 shares, some 1.400.000 under yesterday's almost unprecedented turnover, the difference, however, being wholly in favor of the constructive side.

U. S. Steel led the recovery in greater measure than it led yesterday's decline At the best quotation of the day—107%—it made an extreme gain of 6% points on transactions amounting to about 400.000 shares. Allied stocks. like Crucible, Lackawanna and Sloss-Sheffield Steels and Republic Iron regained 5 to 7 points, the shipping division 8 to 13 equipments 6 to 13 Central Leather 11%, with 8 for American Hide and Leather preferved, an average of about 6 points for coppers and other metals, 5 to 12 for motors, 8 to 12 for oils, 6 for sugars and almost as much for American Woolen, General Electric and various miscellaneous or unclassified stocks.

Ralis of virtually all descriptions—dividend-payers and low-priced issues—were higher by 2 to 4 points, the latter being in especial demand.

Inter

PORCUPINE OUTPUT RAPIDLY INCREASING

Mining Broker Predicts Big Future for Mining Camps in North.

Hamilton B. Wills, in his weekly market letter, has the following:
That the export of gold bullion from northern Ontario during 1917 will at least double that of all other years, may be taken for granted, as during this period Kirkland Lake, Munro, Boston Creek, West Shining Tree, and possibly Kow Kash, will have joined Forcupine as producers of the precious Forcupine as producers of the precious yellow metal. Kirkland Lake already has a large producing mine, but with the completion of the power line, it is not at all improbable at least six other properties will quickly attain this stage. Boston Creek is already proven to contain truly remarkable values with the likelihood of regular shipments being made by at least three values with the likelihood of regular shipments being made by at least three companies. Munro has the fumous Croesus Mine and others adjacent are being quietly developed, while last, so fur as is yet discovered, but by no means least as a productive gold field, comes West Shiniag Tree, with its Caswell and Atlas proven to contain at depth, ore bodies of tremendous size and stupendous values. In regard to this latter fact it was my pleasure this week to see about 300 pounds of samples taken from the main vein on the Atlas at a depth of 40 feet, which were as rich in gold as the Cobalt ore is in silver.

New coinage circulation in England will likely reach \$50,000,000 this year, and with the recent decision to increase

and with the recent decision to increase its fighting forces another million men, it necessarily follows the payment in silver of these, as well as the 1,00,000 men and over already in the field, will

MONTREAL IMPROVED.

Heron & Co., report: Montreal, Dec. 22.—As was to be expected with better news over night there was a decided improvement in the market today. At one time it was quite bare of stocks and there was a complete reversal of sentiment from yesterday's depression. A certain amount of stock came out on the advance and the late trading was more orderly with a good undertone to the
