## NAVY FLYER SETS WORLD SPEED RECORD AT 238 MILES AN HOUR

Saunderson Will Use Same  
Plane in International  
Air Races

New York, Sept. 13.—Lieutenant L. H. Saunderson, U. S. M. C., established a world's speed record over a measured course on Monday at Roosevelt Field, L. I., driving the Navy Wright Fighter at a speed of 238 miles an hour. Lieutenant Saunderson will pilot the same machine in the international races at St. Louis, October 1-3.

The mark he set on Monday was attained by straight-away flying without resorting to diving from an altitude to get up momentum just before reaching the measured course. The record represents the actual speed of the airplane in still air, numerous flights having been made over the course for timing purposes and the average computed to offset the advantage and resistance offered by the wind.

No freak features are incorporated in the Navy Wright Fighter. It is a biplane "cleanup up" and streamlined to the last degree, a single seater, stick control ship of wood and wire construction with radiators for engine cooling forming an integral part of the wing construction in accordance with latest American practice in high speed planes. The plane carries a metal propeller which is of variable pitch in the sense that the angle of incidence of the blades can be adjusted to predetermined settings.

The wing span of the plane is 22½ feet, length of fuselage 21 feet 4 inches, height 7 feet 11½ inches and total weight 2,900 pounds.

This plane and engine were built by the Wright Aeronautical Corporation, of Paterson, N. J.

Just Apply This Paste  
And Hairs Will Vanish

(Boudoir Secrets)  
The judicious use of a delicate paste insures any woman a clear, hairless skin. To prepare the paste, mix a little of the powdered delatone with some water, then apply to the objectionable hairs for two or three minutes. When the paste is removed, and the skin washed, every trace of hair will have vanished. No pain attends the use of the delatone and it will not mar the most sensitive skin, but to insure results, see that you get real delatone.

## Snow And Frost In Central United States

Chicago, Sept. 13.—Snow and killing frosts today set the north and west to donning overcoats, while portions of the central states shivered as the sea of lowered temperatures spread.

Frosts were general throughout Minnesota and the Dakotas last night, but the extent of damage to crops, if any, was not determined. Government meteorologists, who said a recurrence of warm temperatures was unlikely, forecast hard frosts that might cause injury to gardens and crops.

Chicago thermometers were close to the half century mark early today.

**CUTICURA**  
SOOTHES IRRITATIONS

In the treatment of all skin irritations bathe freely with Cuticura Soap and hot water, dry gently, and apply Cuticura Ointment to the affected parts. Always include the exfoliating action of Cuticura in your toilet preparations.

See 25c. Ointment 25c. and 50c. Tubes 25c. Sold throughout the Dominion. Canadian Dispensary, Limited, 24 St. Paul St., W., Montreal.

See Cuticura Soap shavers without soap.

## Mennen's is now the World's Favorite Beard Softener

The world is willing to try new things, but when the ultimate is reached—imitations are futile.

Mennen's 10 years ago invented the beard softener. Imitators are still experimenting to emulate Mennen.

Mennen is still the Shaving Cream of millions of progressive shavers, who don't wish to progress backwards.

## Exhume Boy's Body For Clue To Slayer

Autopsy Conducted By Three  
Physicians Shows Death  
Caused by Strangulation.

New York, Sept. 13.—An autopsy performed at Newark upon the body of Howard Rothenberg, a seven-year-old boy who was murdered at Windham, N. Y., two weeks ago, showed that death was caused by suffocation due to strangulation.

The formal finding of the physicians was that death was caused by "asphyxiation caused by strangulation, not manual, but such as might be produced by a soft rag and cloth being held about the neck and face."

It was said that the examination of the boy's vital organs would not be completed for about two weeks.

The autopsy was performed by Dr. Harrison E. Martland, pathologist of the Newark City Hospital, assisted by Drs. William Minningham and Lyle E. Honeyford, the latter representing the Greene County authorities. It also was witnessed by Acting District Attorney William Thorpe of Greene County, who explained to the Court that exhumation was necessary to serve the ends of justice.

ALFALFA A MONEY CROP.

Average Worth an Acre in Kansas  
This Year Was \$50.

This year's alfalfa crop in Kansas, the most valuable in the history of the State, was worth an average of \$50 an acre. The average value of the crop for the five years ending with 1922 was \$34 per acre, in spite of the general depression and high freight rates.

Kansas alfalfa averages four or five tons a year of 872 tons an acre, or

## Schooner From Here Developed Bad Leak

Beached At Portland, Skipper  
Anxious Awaiting Payment  
of Salary.

(Portland Press-Herald, Monday.)  
Nothing has been definitely settled as to what will be done with the two-masted schooner Tom Beattie of Boston, which put in here recently leaking badly, while in the way from St. John, N. B., to her home port, with a cargo of lumber. She came in leaking badly, and to prevent sinking was placed on the mud flat at South Portland, and taken at the head of Union wharf where she now lies with the tide ebbing and flowing through her.

Captain Greenlaw, her commander, says the vessel leaked pretty much all the way here from St. John, and it was only by constant working of the pumps that she was kept afloat. It will be decided shortly whether to discharge cargo here and send it to Boston on another vessel, or after taking off the deck load tow her there in a partially submerged condition. The vessel is in bad shape and would bring but little if put up at auction to satisfy the libel now on her. The vessel's bills amount to several hundred dollars, and her master, Captain Greenlaw, says she is owing him \$1,200, on which he would make a big discount for prompt settlement. The captain was arrested last week on a charge of selling the vessel's mainmast, which was badly damaged, but was released later, the owner withdrawing the charge.

50,686 STUDENTS IN CANADA.  
According to a report on Canadian higher education, issued by the Dominion Bureau of Statistics, the combined registration of students in the universities and colleges of Canada totaled 50,686, after making deductions for 1,192 students registered at the same time in both college and universities. Of this number 42,964 were of university grade, taking either regular

courses leading to degrees or taking short courses. The remaining 8,722 included among colleges.

for the most part in colleges and affiliated secondary institutions not included among colleges.

**The Tag That  
Guarantees it is Solid**

CAN you tell the difference between genuine walnut and a cleverly stained imitation?

Can you tell whether a so-called mahogany suite is solid mahogany, or one-half or more of it some other wood?

If you can't, how are you going to know for certain that the furniture you select is genuine solid walnut, or solid mahogany, or solid oak?

There is one sure way

Buy furniture bearing the Gibbard trade mark, and with the Gibbard Guarantee tag attached to each piece.

The Gibbard Tag assures you getting the genuine thing. It guarantees solid satisfaction—genuine solid walnut, solid mahogany or solid oak. It enables you to buy furniture with absolute confidence.

The Gibbard Guarantee

Tag is a big thing in the furniture business to-day. It is the most important thing to look for when you buy.

In keeping with the fine solid woods used, Gibbard Furniture is finished so as to bring out the full beauty of their grain and texture.

Another feature is the beautiful decorations which are all executed by hand carvers. They are made of solid woods, too, not some composition.

Just as an example of the excellence of the Gibbard construction, ask your dealer to pull out a Gibbard drawer, say, on a mahogany dresser.

Note how well-finished it is—how true it runs—how smooth the inside—and how beautiful the mahogany drawer sides and bottom look. You'd be proud to put your clothes in a Gibbard dresser drawer.

The dining room suite illustrated is the latest Gibbard dining room suite of the Chippendale period.

If your dealer hasn't this handsome suite in stock, he can obtain it for you, or any of the other Gibbard dining room and bed room suites, library tables and writing desks. He has a Gibbard Catalog showing large photogravure pictures of Gibbard Colonial, Chippendale, Queen Anne, Italian and Georgian designs.

Just think of the pride, the pleasure and the satisfaction of owning a suite of furniture that you know is the real, genuine article.

Tell your dealer you want Gibbard Furniture—the kind with the printed and signed guarantee.
