**MISSIE'S REDINGOTE WAIST.**

chic and comfortable about the redingote waist, and it will find instant favor. It is made with an underbody which provides for a high or open neck, and the adjustment is effected under a pleat at the front and on the left side. The design is worn over an accordion pleated skirt of satin and wool charmeuse.

Three and one-half yards of 64-inch gabardine make the redingote. Other needs are 1 yard of 27-inch lining, 1/4 yard webbing 2 inches wide for stay, 1/4 yard ribbon 5 inches wide for sash or 1/4 yard 38-inch material.

Three parts of the pattern, the front, the back and collar, marked by triple "T-T-T" perforations, are placed on a lengthwise fold of the gabardine. Sleeves have notations for shorter length, and small "o" perforations show how the outline of the neck can be determined. The sleeves, pleat, sash-band and cuffs are cut on a lengthwise thread of the goods.

After making the sleeves and underbody, both of which are practically child's play, begin the construction of the outside. Slash down fold at center-front from upper edge to large "O" perforation. Sew pleat underneath right front edge, notches even and graduate seam into nothing at lower edge of slash. Turn pleat over on outside on large "O" perforation; stitch as illustrated; bind remaining slash edge. Close under-arm seam as notched, leaving seam on left side free above large "O" perforation in back for opening. Close right shoulder seam, finish left shoulder seam for opening. Turn hem at lower edge of front and back on small "o" perforations. Sew flare collar to neck edge as notched. Adjust strap on front as illustrated (corresponding single and double small "o" perforations even) to pass a ribbon belt through.

Four yards of 38-inch wide satin will be needed for the skirt and sleeves.

**CUTTING GUIDE 5935**

A redingote waist that stands out prominently among the new models because of its comfortable and chic lines. It is made of gabardine and black satin.

There is something indescribably charming about the redingote waist.

**HAVE YOU A NEEDLE ECONOMY HINTS FOR THE HOUSEWIFE**

BY MARGARET J. BLAIR  
(Lecturer on Home Economy, University of Minnesota).  
(Copyright, 1914, by Margaret J. Blair).

The charm of life is in service—the service of the man to the woman, of the woman to the man, of both to their families and friends.

A woman is never so attractive as when she is mixing biscuits or making cookies in her kitchen. Don't spoil the pretty service and all it means to husband and children by going about it in torn and soiled garments.

Blue and white are the colors that look cleanest and therefore best in the kitchen. The best cotton fabrics for kitchen dresses are dyed in the yam. They do not spot or streak as those dyed in the piece do.

**An Economical Kitchen Apron.**

Below I give the most economical plan for making an apron.

**Materials**—Three-fourths of a yard of checked gingham, white silk-finish for loop stitching, while thread and needles to correspond to thread.

**I.—Hemming the Apron.**

1. For the band, take off a piece 21-2 inches wide down one side. Cut the selvedge from both sides first.
2. When goods is washed the selvedge is likely to draw, so it is better to remove it.
- 3.—Turn a 1-8 inch hem on both long sides of the gingham. Be sure that they are both turned onto the same side.
- 4.—After basting the hems, hem them with very fine stitches as you learned in Lesson IV.
- 5.—Make a 1-2 inch hem at the bottom.
- 6.—Find the length of the bottom.
- 7.—Divide the number you get by three, measure in from one corner the number of inches you got by dividing, and mark the place by putting in a pin; do the same from the other corner.
- 8.—Baste the pocket down across the top and baste the pocket to the apron, beginning at the pins and following a row of checks to the top of the apron.
- 9.—Use the 1-2 inch basting stitch with the

1-8 inch spaces. This makes the pocket into three small ones.

- 10.—Thread your coarse needle with the white silk-finish and knot the end of the thread.
- 11.—Hide the knot under the hem and chain-stitch along the bastings. Each stitch should be two checks long if the checks are small; if they are large make the stitch one check long.
- 12.—When the bottom is reached carry the thread through to the wrong side and fasten with three short back stitches one directly over the other.
- 13.—Pull the bastings.

**III.—To Gather the Apron.**

- 1.—Take a piece of thread and knot it.
- 2.—At the right side, 1-4 inch from the top, begin sewing.
- 3.—Holding the cloth and needle between the thumb and first finger of the right hand, take a needle full of running stitches.
- 4.—Wind the thread around first one end of the needle, then the other, to hold the cloth on it.
- 5.—Hold the cloth between the thumb and first finger of the left hand and with the right hand pull the gathers till they are even.
- 6.—Now bring the needle through after unwinding the thread.
- 7.—Finish gathering the apron in this manner, straightening each needleful as you go on.
- 8.—Leave a piece of thread and tie a knot in it instead of fastening.

**IV.—To Put on the Band.**

- 1.—Remove the selvedge from the piece of material you wish to use for a band.
- 2.—Find your waist measure and add to it 1 1/2 inches.
- 3.—Measure off this distance on the piece you have for a band and cut it off.
- 4.—Find the center of the top of the apron and the center of the band. Mark right hand, take a needle full of running stitches.
- 5.—Pin these points together, being

**PEEVISH, CONSTIPATED CHILDREN LOVE "CALIFORNIA SYRUP OF FIGS"**

Hamless "Fruit Laxative" Cleanses Stomach, Liver and Bowels

Look at the tongue, mother! If coated, it is a sure sign that your little one's stomach, liver and bowels need a gentle, thorough cleansing at once. When peevish, cross, listless, pale, doesn't sleep, eat or act naturally, or is feverish, stomach sour, breath bad, has stomach ache, sore throat, diarrhoea, full of cold, give a teaspoonful of "California Syrup of Figs" and in just a few hours all the foul, constipated waste, undigested food and sour bile gently moves out of its little bowels and you have a well, playful child again.

You needn't coax sick children to take this harmless fruit laxative; they love its delicious taste and it always makes them feel splendid.

Ask your druggist for a 50 cent bottle of "California Syrup of Figs" which has been recommended by all the leading physicians for babies, children of all ages, and for grown-ups plainly on each bottle. Beware of counterfeiters! Get the genuine, made by "California Fig Syrup Company." Refuse any other kind with contempt.

**Great Bargain Sale of Ladies' and Children's Fall and Winter Hats**

Commencing on Tuesday Morning November 17th in Our Millinery Department

This sale comprises all the newest shapes, styles and colorings that are now in vogue in the world's chief fashion centres, but space will not permit us to give more than a general idea of the genuine bargains to be offered.

**Christian Workers In Turkey**

Group of American missionaries and other Christian workers now stationed at Smyrna, Asiatic Turkey. This photograph was taken in the home of one of the missionaries after a mission prayer meeting.

careful that the right sides of both are together.

- 6.—Find the middle of each half of the band and mark with a pin.
- 7.—Pin both ends of the gathers just a little inside the points just marked.
- 8.—Draw up the gathers until the apron just fits the part of the band inside these pins.
- 9.—To keep the thread from slipping, wrap it around the head and point of a pin.
- 10.—Baste the gathers to the band, taking care that they are even and not in bunches. Use the 1-4 inch stitch with the 1-8 inch spaces. Always hold your work with the gathers on top.
- 11.—Use a fine combination stitch in sewing the gathers to the band.
- 12.—Fasten the gathering thread, then pull the bastings.
- 13.—Begin at the gathers on one side and fold the band in about 1-8 inch all the way around to the gathers on the other side.
- 14.—Turn the band over the gathers. This will bring the folded edges together. Be sure the band covers the gathering stitches.
- 15.—Baste the band together along the ends and open side.
- 16.—Overhand both the ends and lower edge of the band even with the gathers on both sides.
- 17.—Hem the band to the apron along the gathered part. Be sure your stitches are short.
- 18.—Pull the bastings.

**A CONTAGIOUS THRILL.**

There used to be a familiar diversion in the high school laboratory, when the science master stuck two slabs of metal into an acid and got a whole string of boys and girls to join hands in a circuit. The more people there were in the circuit the greater the fun. With only one or two the shock seemed to hurt. With a large number it made everybody hanoi. It's the same way with buying goods made in your own country. At first it may seem an awkward thing to do. But as soon as a few other people get into it, and these few get each a few more into the swing and the good cheer of the movement, there begins to be a general feeling of elation that becomes contagious. Everybody catches it. Everybody is delighted.

There is about this made-in-Canada movement the exhilaration that comes from being part of a great revival of home interest. Looking at it individually no man sees much in it. Looking at this and that purchase as part of a grand along that line gets a snap and a desire for more. Once this made-in-Canada movement gets going, a man or woman might as well be out of the world as out of the fashion. And the joy comes from being one of a large number engaged in the same thing.

**SCROFULA AND ALL HUMORS GIVE WAY**

There are many things learned from experience and observation that the older generation should impress upon the younger. Among them is the fact that scrofula and other humors are most successfully treated with Hood's Sarsaparilla. This great medicine is a peculiar combination of remarkably effective blood-purifying and health-giving roots, barks and herbs, and has been tested for forty years. Get it today.

The coal required for one voyage between New York and Liverpool by a modern liner would fill twenty-two trains each made up of thirty, ten-ton cars.
