A Plan Suggested Which Will Widen the Scope of the Jubilee.

Tenders Awarded--A Pioneer's Legacy--Finance Minister's Promptitude.

The first business meeting of the reorganized board of directors of the Provincial Royal Jubilee Hospital was held last evening in the Board of Trade rooms, when a goodly amount of routine business was transacted, including the consideration of tenders received for supplies during the coming year.

One subject of considerable interest was brought up, the further consideration of which was left primarily in the hands of a special committee who will report to the board at a later date. It involves a scheme, which, if adopted, may have the effect of making a considerable change in the financial position and in the system of the institution. It arose out of an application made by Mr. Cockburn, of the E. & N. Railway Company, on behalf of certain employees of the road, who are willing to establish a fund among themselves for the support and treatment of any of those who may require admission to the hospital. This led to a statement by Director Wilson to the effect that Captain Rudlin, of the C.P.N. Company, had made a similar suggestion regarding the employees of

that company. Mr. Joshua Davies mentioned the German Hospital in San Francisco, which is largely supported by the monthly contributions of a large number of the working classes, limited to almost a nominal sum, in return for which each contributor is entitled to the benefits of the hospital. It was suggested last night that if all the employees of the E. & N. railway, some 300 in all, would contribute to a fund, say \$1 each per month, the hospital could afford to give treatment to those contributors who need it. Extended along these lines to all the employees of other large institutions, the Albion Iron Works, for instance, the directors pointed out that a very large increase in the funds of the hospital would result. The objections mooted last evening to the suggested plan were mainly that it

is possible several employees of one company might require treatment at the same time, and that the adoption of such a plan might cause friction with the medical staff. It will be the work of the special committee appointed, to enquire into all these possibilities and submit the result of their enquiries to the board. Part of their duty will comprise the compilation of statistics bearing on the question ,in which regard a remark made by Mr. James Foreman, one of the new directors, which is brimful of inter-He said that returns he had seen were to the effect that of the employees of the railroads in the United States 1 in every 27 meets with injury in a year. mmittee discharged. Minister of Finance Carter-Cotton replied to the request of the board that the government contribution of 50 cents per day's stay of patients be paid to the trea r monthly, informing the board that the department coincides with their views, and if a statement be turned in ster special says: the amount will be paid each month for the greater convenience of the board in shot dead at Point Roberts to-day by a the payment of monthly accounts.

Nurses Beatrice Allison and Gertrude Hadwen acknowledged with thanks the receipt of the medals granted them by the board.

Then came the tenders for the supply of provisions, etc., to the hospital for the year commencing August 1st. The scaengering contract was awarded to Ed. Lines, of Yates street, the only tenderer, the payment to be \$13 a month.

For the supply of bread, two tenders were received, one at two and three-fifth cents per pound, the other at two and a quarter cents. President Wilson said that bread was one of the most important items of diet in the hospital, and it was imperative that the best quality be obtained, if even at a little extra cost. a sufferer from above troubles and afventing Bright's Disease, Diabetes.
