SUMMER COLDS Produce Chronic Catarrh.

Madame Isabella Elton Baynes, Life Governor Grand Lodge of Free Masons of England, writes from Hotel Saratoga, Canada, N.Y., June 23, 1903. "The summer while travelling contracted a most persistent and annoying cold. My head ached, my eyes and nose seemed constantly running, my feet were swollen and I had a most distressing cough. I tried all manner of pills and powders, but to no purpose. I advised with a doctor and he spoke so highly of a medicine called Peruna, that he induced me to try my first bottle of Peruna. It proved such a relief to me that I soon purchased a further bottle and kept on until I was entirely well."

Summer colds are rampant treatment. They are always grave, and sometimes dangerous. The promptness and surety with which Peruna acts in these cases has saved many lives. A large dose of Peruna should be taken at the first appearance of a cold in summer, followed by small and repeated doses. There is no other remedy that medical science can furnish, so reliable and quick in its action as Peruna. Address The Peruna Medicine Company, Columbus, Ohio, for a free book entitled "Summer Catarrh," which treats of the catarrhal diseases peculiar to summer.

CABINET BLAMED FOR BRITAIN'S ACT.

(Continued from page 1.) There was a debate on Senator Beique's bill respecting free labor. By this bill, which was to amend the criminal code, any assembly of three or more persons came an unlawful assembly. In time of strike, he said, it was impossible to convict for violence. The bill provided against picketing, naming and naming some opposition, but got a second reading. The re-education committee met this forenoon and was going to take up the province of Manitoba.

Mr. Hyman, the chairman, announced that as Senators Watson and Young were to be heard in respect to the proposed changes, the committee would adjourn until the evening.

Dr. Roche protested against hearing anyone outside the members of the house. There were three Liberal members of Manitoba and three Conservative, and they were quite ready to settle up the matter with their Liberal friends, but he added that it was absurd to be sending anyone outside of members of the house of commons.

Mr. Roche and Sutherland did not see it that way. They thought the committee should hear anyone who was in a position to give any information which would aid the committee in arriving at a settlement of the question. The precedent of hearing witnesses was laid down already when Senators Loughlin and Parby were held by the order of the opposition. The committee adjourned until 8.30 to-night, when the province of Manitoba will then be taken up and after that Ontario.

THE SHAMROCK III. A WONDERFUL BOAT. (Continued from page 1.) Not vitally concerned in the expense of the boat. That was purely incidental. Shamrock a wonder. Returning to the subject, after an interruption, Sir Thomas said: "Even if I never win the cup, I shall feel myself richly repaid in having won the friendship of the American people and having been in some small measure instrumental in bringing about closer relations and a better understanding between the two countries and those of my own."

"Shamrock III has more speed than has ever been shown in a wooden boat, as all know who have seen her sail; a very wonderful feat, especially to windward. Added to Capt. Robert Wright's skill as a sailor, it is not surprising that she has won the cup. Mr. Fife will be on the boat in all her races. He will sail her with skill and will have full charge. Mr. Fife is the best amateur sailor in Great Britain, and so one can rest assured that she will be especially when on one of his own boats. Mr. Fife has understood each vessel perfectly, and together they make a great pair on a racing yacht."

When asked his policy with regard to holding to his rights in starting Sir Thomas said: "I know how Capt. Wright. He is a very good sailor and a very good manager. I have no objection to his sailing her. I have no objection to his sailing her. I have no objection to his sailing her."

While the fire licked up everything else in its path, melting even car wheels, the bear escaped with only a slight singeing to his coat. When the clouds rolled by he emerged from his cyclone collar to find himself surrounded by smoking ruins. He is now being cared for, while his master is making arrangements for rebuilding Mr. Sullivan has a little lumber on the ground today.
