Areas of Canada and Other Lands.
Canada is larger than continental United States, whether you include the water areas or not. Here are the figures in square miles:

	Canada.	U. S. and Alaska.
Land	3,603,910	3,564,774
Water	128,755	52,899
Total	3,732,665	3,617,673

So the land area of Canada exceeds that of the United States by 39,136 square miles, which is almost equal to the combined area of Denmark, Belgium, and Holland (18,552, 11,373, and 12,648—in all, 39,503). The combined land and water areas show a difference of 111,992 square miles. The figures are taken from official publications, those regarding Canada from the "Canada Year Book," and those regarding the United States from the "Statistical Abstract of the United States." (2) The area of Europe is 3,800,000 square miles, which exceeds the area of Canada by 71,000 square miles, or a little more than the area of North Dakota (70,183 square miles). (3) Europe is one-third the size of Africa, one-fourth the size of America, and one-fifth the size of Asia.

"Hudson Seal."
The tremendous demand for the skin of the humble muskrat, "Hudson Seal," when it appears in mid-lady's coat or muff, has won it a high rank in the indictment against the high cost of living. Eastern rats are now being sold in New York at \$3.75 apiece, as compared with 55 to 60 cents in 1915, and that the Western Canadian variety brings \$2.60, as against thirty cents in pre-war days.

Halifax Wants Olympics.
The permanent Olympiad Committee has received a request that the Olympic games in 1924 be held at Halifax. The question will be decided at the games to be held at Antwerp next summer and several countries are expected to be strong contenders.

No Salesmanship Required.
"You no longer indulge in the perfunctory style of oratory you used to affect."
"Now," yawned the real estate man, "I simply tell 'em I've got a house for sale. They don't ask any more."

Economy and ease of operation, particularly safe and suitable for women to drive.

Valve-in-head motor, unusual speed and power.

The outstanding features of nearly all the most famous cars of Europe are valve-in-head motors and Zenith carburetors, such as you get in this low-priced Chevrolet.

You begin to understand the reason for this when you hear reports of Chevrolets going from 30 to 48 miles on 1 gallon of gasoline.

In addition to getting the most powerful motor known for its dimensions, you get an enameled body, nice close-fitting curtains, genuine Dupont Fabrikoid upholstery (the very best fabric to wear) and very comfortable riding qualities, with greatest ability to hold the road.

Chevrolets are 36 per cent. dearer in Canada than in the United States. All other cars are 42 to 70 per cent. dearer.

We handle no other makes of motor cars, as we cannot see any other make whose price and features make good comparative value.

The Company is backed by a capitalization of \$5,620,000,000, showing that financial strength and enormous production make the price so low.

Dotterer & McFarlane are looking after the mechanical end of the business and give guaranteed service for Chevrolets as well as other cars. A goodly stock of Chevrolet parts are kept. Batteries stored and charged. Prompt attention to every call. Phone 49.

Chevrolet foresaw the tendency of all manufacturers to build cars of lighter weight as well as refinement. Their foresight and experience has evolved this incomparable leader of light cars at a price that puts it in reach of all.

Look all the cars over and compare them with Chevrolet 1920 models.
