

The advantages offered by the city of Montreal for the practical study of Medicine and Surgery are unequalled in the Dominion. In the wards of the General Hospital there is always—and more particularly in the summer months, when navigation is opened—a large collection of interesting medical and surgical cases. In the out-door department there is a daily attendance of between 60 and 70 patients, which affords excellent instruction in Minor Surgery, routine medical practice, and Diseases of Children. The Eye and Ear Department will afford to the student an opportunity of studying practically, under skilled direction, these important branches. At the University Dispensary there will be Demonstrations on Gynæcology, on Diseases of Children, and on Diseases of the Skin.

Dresserships and Clinical Clerkships may be obtained on application to the Attending and Out-door Physicians.

The Faculty has much pleasure in announcing the following prospectus :
