Don't Take Our Word

Regarding the Cure of William McKay, Baggageman,

Solemn Declarations Talk For Us.

For some time I have been more or less afraid of my lungs, owing to the fact that my first wife, stepson and daughter died of consumption. Late in the summer of 1900 I developed a cough which gave me great uneasiness. The cough steadily grew worse. The doctor advised me to lay

Late in the summer of 1900 I developed a cough which gave me great uneasiness. The cough steadily grew worse. The doctor advised me to lay up.

I got up on the 15th of October and had a relapse. I called in another physician and he found my temperature to be 1022-5 degrees. He told my wife, after consulting the attending physician, that my lungs were effected. I had night sweats regularly. No one was allowed to see me. My child had been sent to Toron to, as the doctor told my wife that the slightest disturbance might take me off at any time.

On the 10th of November the doc tor cut off four of my medicines; he regarded my case so hopeless that he told my wife to give me anything I wanted to eat, as it did not mat ter.

On the 12th of November Mr. Me Eachern, my baggage mate, brought my wife a bottle of Powley's Liqui fied Ozone, and she asked me if I would try it. I would have taken anything, I was so desperate, and I started taking the Ozone on Novem ber 14th and left off taking the doctor's medicines altogether. The first dose seemed to be what my system craved for, and in four days my cough stopped. I steadily improved and on December 24th I weighed 156 pounds, about 50 pounds more than I did when at my worst. I have no more expectoration, my lungs give me no trouble, and I am satisfied that I am cured.

I ascribe my recovery to the grace of God, and to the use of Powley's Liquified Ozone. I firmly believe that but for this preparation I would have been in my grave. (Signed) Wm. MsKay, Sutton West, Ont.

This statement is corroborated by the solemn declarations, made before A. Crozier, B. A., Ll. B., a notary public of W. P. Cole, J. P., E. M. Fisk, Station Agent, Dr. Frank Daly, V. S., Hiram Johnson, Esq., M. McCarthy, Conductor, Midland Division, G. T. R., and Jas. McEachern, Brakesman, Rev. A. P. Brace, Pastor of the Methodist Church in Sutton, and Mrs. McKay also make statem ents.

This statement shows the value of the condensed oxygen treatment for all lung troubles. Powley's Liquified Ozone is condense

EATS UNCOOKED FOOD

PROFESSOR TYLER'S METHOD FOR THE CURE OF ALL DISEASE.

He Claims Cooked Food Is the Greatest Curse of Humanity and Says It Shortens Life and Makes Us Moral

and Physical Degenerates. As a result of my own experiences and of tests made by other persons at my direction and under my observation I am firmly convinced that cooked food is the greatest curse of humanity. I hold that cooked food is responsible for nearly all the great pestuences, contagious diseases and other bodily ills, that it shortens life generally, that it causes crimes and makes people moral degenerates as well as physical degenerates and that it heaps untold misery upon the world by so greatly increasing the cost of living as to bring hunger and want into the land and

cause millions to toil their lives away for the mere sake of eking out an existence. I will wager all the success I expect to obtain in saving mankind from the disastrous effects of taking dead cells into their systems on the assertion that any person who for 90 days will give raw food a test will at the end of that time declare that he never felt better in his life, that he is of a happier disposition, that his mind is clearer and that he is

improved in all respects.

A child raised on uncooked food will be a giant, physically and intellectually. There is no doubt that the ancients lived longer than we and that the average life of man is growing shorter all the time from no other cause than the continuous in inrious effects being wrought by cooked

food on the human race.

It was never intended that any living thing should derive substantial suste-nance from that which has been destroyed. Food when cooked is destroyed. It

is the mission of fire to destroy.

We take into our bodies dead cells to eplace the wornout cells cast off from he body. Man, with his superior intelligence, should live much longer in the time that it takes him to develop than any other animal. Instead there is nothing that breathes that doesn't live five times as long as man proportionately. By eating natural food health, as with the lower animals, would be the rule and ill health the exception.

I had reached 50 years of age. My height was 5 feet 8 inches, my weight 232 pounds. I had been afflicted with kidney trouble from youth. I contracted eczema from vaccination.

I suffered from sciatic rheumatism in my left hip and thigh. My head was always full of dandruff; my finger nails were short and brittle. With these afflictions I was looked

upon by most people as a health in. I myself did not realize in what a serrible condition I was until I had tasted the joys of perfect health. In two years raw food diet reduced me to normal weight. My kidney complaint vanished the moment I removed the continuing cause and commenced to live on raw diet. Within six days after beginning my new diet my rest was the most refresh-ing it had been in seven years. The dan-

druff disappeared from my head, the ec-zema was speedily cured, the rheumatism emained with me for 90 days, but finally My teeth became remarkably firm and The calcareous deposits throughwhole system have been loosened up and carried away by the pure water I have taken into my system, either in eating the diet of raw food or absorbed

from the atmosphere.
Since knowing of my own personal experience these remarkable blessings from eating raw food I have made it my mission in life to endeavor with what means and energy I possess to convert the world into my practice. All I ask of any

person is to give it a test.

As to what kind of raw foods you eat it doesn't make much difference unless suffering from some especial ailment. Anything that is good cooked is better raw. By giving the diet a test you will find in a short time that you enjoy your meals more than you ever did before. most any disease may be cured by eating

the proper kind of raw foods.

A person living on uncooked diet need have no fear of coming in contact with contagious diseases. He may go where there is pestilence, but his constitution has become so healthful that it will cast off all disease germs. Man may be made just as free from smallpox, yellow fever or bubonic plague as a horse. He car travel in any country without fear of at-

fliction from the climate.

In cooking food all the acids and gases so necessary for the conservation and preservation of ideal health escape with the steam, and the food retains a greater supply of ash, lime and other such substances than enature requires for the amount of food taken into the system. Cooking is all a notion, and a very bad one for the human race. It began somewhere back in the prehistoric ages as a fad and has continued to work havoc with humanity ever since. It is more disastrous than the tobacco habit.

disastrous than the tobacco habit.

I would suggest as a daily diet plenty
of fruit for breakfast and supper. Cereals
and nuts are the meat, though I have no
objection to dried beef for the diet of a well person.

There are millions of things a person

can eat without cooking. All vegetables are better raw than cooked. Onions, radishes, tomatoes, turnips, carrots, lettuce, cucumbers, mustard and numerous other garden products could be mentioned.

Then among the fruits there are pineapples, peaches, pears, grapes, berries, bananas, cherries and numerous others that are healthy and relishable. The melons are all well recommended. Dried prunes should be eaten for breakfast and luncheon. Salt should be taken into the system only when nature calls for it.

Bernhardt In a Temper.

Bernhardt In a Temper,
One night when the attendance in a small town in the French provinces was especially bad Sarah Bernhardt, bored by the small size of the audience and its stupidity, resolved to make the most of it. The play was "Camille," but instead of speaking the lines as Dumas wrote them Sarah made up the play as she went along, interpolating such opinions as from minute to minute she had of the audience. She called them unutterable things and in a highly dramatic way. The innocents applauded these sentiments vigorously, upon which she called them something worse.

Mohammed dyed his beard red, and his example was extensively followed among the Arabians. He disliked black hair, and his favorite wife blondined her tress-

Even Though They Never Existed

Their Memory Is Cherished. "I was very much surprised to leare the other day," said a visitor from Burlington, Vt., at one of the hotels, "that Jackson had no cotton in his fortificaions during the battle of New Orleans tions during the battle of New Orleans. Whether the younger generation is better advised I am unable to say, but the cotton bale legend is believed religiously by middle aged people all through the New England states. They are proud of it as a master example of what might be called Yankee cunning, and before you could shatter their faith in the story you could persuade them that Wash-ington didn't cross the Delaware and that Benedict Arnold was a high minded

American patriot.
"I attended public school when I was a boy at Greenfield, Mass.," continued the speaker, "and I remember distinctly the account of the battle of New Orleans that was given in our 'Intermediate History of the United States.' It described the cotton bale fortifications as a happy inpiration which came to Jackson at the last moment as a possible means of off-setting the immense preponderance of the British forces. According to the parrative the cotton was piled up in a gigantic wall, and when the enemy's artillery opened fire the projectiles bounded back from its surface like rubber balls thrown gainst the side of a house. I remember that the incident tickled us boys im nensely. We thought it was such a good joke on the Englishmen, and years after ward whenever anything would remind me of the battle of New Orleans I would instantly have a mental vision of a crowd of astonished artillerymen dodging their own cannon balls. The small American loss was attributed solely to this remarkable piece of strategy, and the chapter was embellished with a full page wood cut, which is as clear to my mind's eye as if I had seen it yesterday. It represented what was evidently intended to be ne of the fortifications-a solid, square ided, rectangular wall of bales, with reg ular apertures for cannon. On one side was a line of men deesed like the traditional dime novel trapper, each with a coonskin cap on his head and a rifle about nine feet long, and on the other side was a dense mass of British grenadiers, wearing what looked like bishops miters. A number of cannon balls were seen lying on the ground outside, where they had bounded from the elastic ramparts, and the grenadiers were plainly getting the worst of it.

"That picture stands today as the accepted New England version of the battle, and the man who attempted to pluck out those venerated cotton bales and substitute ordinary Mississippi river mud would have a disagreeable job on his hands. I wouldn't like to undertake it."

CRANK LETTER WRITERS.

Individuals Who Make Trouble For

the Postoffice Officials. Eccentric letter writers move the postoffice employees to profanity and their correspondents to mirth and doubts as to their sanity. Many people have a mania for putting stamps on envelopes in unusual prices. What especial pleasure they find in this it is difficult to say, but they evidently find it, for they display considerable ingenuity in selecting strange places on the envelope. The back of the envelope, the lower left hand corner, the middle of the envelope, etc., are sought out by this form of crank.

Then there are the people who persist in affixing the stamp "skew cornered" and those who have a mania for putting it on upside down. All these eccentricities cause great annoyance to the postal clerks. Probably the criminals who commit the deeds consider that their stamp juggling shows "individuality.

A person well known to the British postal authorities always writes the address on the postage stamp. An interview with a mail clerk on a lonely road would probably not be a pleasant experi-ence for this person, but to the credit of the service it may be said that these sin-gularly addressed letters have always been delivered punctually and correctly. In St. Louis is a man who always writes his letters in rhyme. Even a note to the butcher is a "poem." This highly gifted individual says that he can write verse better than prose; hence his "dropping into poetry." A pedantic young London doctor is accustomed to write his letters to his intimate friends in Greek characters. As his circle of ac-quaintance is fairly well educated, the result is not so perplexing as it be. A cotton manufacturer of Manches ter, England, uses different colored inks

when writing letters, making the color appropriate to the occasion. Thus for business purposes he uses black ink, for personal acquaintances red ink, and to ladies he writes in ink of a delicate violet hue. Some people try to get all the stamps they can on a letter instead of using one stamp of the required denomi nation. A letter recently was received from a French crank which had on it 15 stamps to make up the 5 cents required This extraordinary collection consisted of ten stamps each of 2 centimes value and five of 1 centime value each.

Bill Anthony's Coolness. Bill Anthony was one of the best examples that cause out of the Spanish war

of the man who can keep his head when others have lost theirs. His coolly indif-ferent announcement to Sigsbee that the Maine was sinking either showed a soul disciplined to the condition of an audisciplined to the condition of an automaton or a spirit which nothing could dismay. I once asked Captain Sigsbee if the popular version of Anthony's speech was correct. He said it was, but that Anthony did not salute him, as was generally told, nor preface his speech with. "I beg to report, sir." "We bumped into each other in the dark." Sigsbee said, "and if he had saluted and spoken with that formality he would have been thinking of himself and of making an effect and not of his duty. What he really said and did is better without any of the additions, which came later."—Richard Harding Davis in Everybody's Magathe additions, which came later."-Richard Harding Davis in Everybody's Maga-

Characteristic. "Woman has no sense of humor,"
"No, but she seems to have an awful
sense of being humored."

The fight against slavery in the country was a prolonged one. In 1775 in the city of Philadelphia the first antislavery ciety was organized.

There are more beautiful and costly llustrated trade catalogues issued in this country than in any other section of the

The little child is safe from ordinary dangers in the care of the faithful dog. But neither the dog's fidelity, nor the mother's love can guard a child from those invisible foes that lurk in air, water and food—the germs of disease. Children need to be specially watched and cared for. When there is loss of appetite, lassitude and listlessness in a child, an attempt should be made to revive the appetite and rally the spirits. In child, an attempt should be made to re-vive the appetite and rally the spirits. In Dr. Pierce's Golden Medical Discovery parents have found an invaluable medi-cine for children. Its purely vegetable character and absolute freedom from alcohol and narcotics commend it to every thoughtful person. It is pleasant to the taste, unlike the foul oils and their emulsions offered for children's use. "Golden Medical Discovery" makes pure blood and sound flesh, and absolutely eliminates from the system the poisons which feed disease.

poisons which feed disease.

Mrs. Ella Gardner, of Waterview, Middlesex Co., Va., whose daughter suffered from malarial poisoning and catarth, writes: "My little daughter is enjoying splendid health. I am glad I found a doctor who could cure my child. She took twelve bottles of the Golden Medical Discovery,' eight bottles of 'Pellets,' and one bottle of Dr. Sage's Catarth Remedy, and she is well. We thank God for your medicines."

Give the little owner Dr. Pieners's Plant

Give the little ones Dr. Pierce's Pleasant Pellets when a laxative is needed. They're easy to take and don't gripe.

THE REVIEWER.

At last reports Mrs. Nation had not buried the hatchet.-Philadelphia Inquir-

France is evidently drawing unlucky cards again, as Dreyfus is writing a book and W. W. Aster says he may move

to Paris. Sir Thomas Lipton, coming gayly after "that bit of family plate," as he describes the America's cup, will find it on Uncle Sam's shelf marked "Personal."—New

York Herald. England's "splendid isolation." which her statesmen have boasted for years, has of late grown irksome. The day has passed when any European power can play solitaire in the great game of

world affairs. A shrewd French journalist proposes scheme to abolish the duel simply by keeping the names of the duelists out of the newspapers. Honor without notoriety, he thinks, will not be so valuable as to fight about.

Must we wait until the next generation for 1 cent postage, for lower telegraph and telephone charges, for lessened express rates, for cheaper coal, ice and gas, for the abolition of tips and for a less expensive cab service? All these blessings
