town chopped her up and put the pieces barrel. She was sentenced to be hanged but the sentence was a erwards com uted.

-It is reported from Madrid tha Cuba is ripe for revolution. The count ry is almost in a state of anarchy. In the towns commerce is ruined, and public is so discouraged that hope for the future is abandoned, while in the country strong bands of bandits and sequestrators are described as carrying on a nefarous trade in the most open and barefaced nanner. Trains are stated to have been topped and pillaged, passengers not frequently murdered, farms and home eads burned and their owners sequest.

-At the present time no part of Canada is attracting more attention than Manitoba. Wonderful progress has be en made there. Ten years ago it was practically an isolated and unsettled country. To-day it has a population esttimated by many to be nearly 150, 000. There are about 1, 500 miles of railroad iving good markets in most of the put under crop.

The People's Mistake.

People make a sad mistake often with serious results when they neglect a constipated condition of the bowels. Knowing that Burdock Blood Bitters is an effectual cure at any stage of constipation, does notwarrant us in neglecting to use it at the right time, Use it now.

Statistics about the Echo. Some one recently figured out the

exact distance that a person may be removed from a reflecting surface [and yet hear the echo of his own voice. Five syllables a second is said to be the limit syllable and the next fifth of the second

## The Height of Waves.

it of audibleness.

It is a very common phrase to speak of the waves during a storm as running nountains high; this really means noth ng. Accurate measurements made by scoresby proved that during storms, waves in the Atlantic rarely exceed 43 Castle, the home of Lady Henry Somer feet from hohow to crest, the distance between the crest being 560 feet and their speed 324 miles an hour. More recent observations in the tlantic give from 44 feet to 48 feet as the highest neasured waves, but such heights are arely reached, and indeed, waves ex no one at that time imagined the deceeding 30 feet are very seldom encountred. The monsoon waves at Kurrachee breakwater works were found to dash over the wall to the depth of 18 feet or as the expected hundreds would have bout 40 feet above the main sea level. been. Rev. A. Johnson and Mr. J. The greatest heights of waves on the Poole presided at the meetings, while

British coast were those observed in noted men and women occupied the Wick Bay-so famous for the exceptionally heavy seas which roll into it—being platform and participated in the exer-37½ to 40 feet. Green seas to the depths of 25 feet poured over the parapet of the breakwater at intervals of from seven to cen minutes, each wave it was estimated of the noble hostess. "I know no greater pleasure." she said 'then that

## Possibilties of the Telephone.

Though the telephone has long since

ased to be a wonder, its great powers and adaptability to various purposes as yet but hinted at, must still command contemplating the work done by this its liquor bill would have been over instrument in the installation at the £1,500, instead of £27. It is well that Lenox Lyceum, by which the "long distance of the contemplating to ponder these tance" telephone company has placed figures; when they go a step farther roots cannot be used profitably to any before the public an exhibit of superb and learn the fact that the death rate in qualities. It seems strange indeed, that the hospital which uses no lixuor is from up to the present time, the telephone four to twelve per cent less than in those exploiting a field which could certainly drunkard making in hospitals is past. be made a source of considerable re venue by the furnishing of musical and other entertainments by wire at the fireside. But still more impressive than the musical part is the remarkable clearness of the long distance transmision, the mind can yet hardly grass mision, the mind can 'yee' nardly grasp settled parts of the province. There are schools, roads, and churches all which permits persons hundreds of miles apart to maintain perfect oral intercourse Yet we believe the time is not remote. When even this will cease to attract even passing notice; when the 'long distance' lines now mostly confined to the Eastern States, will cover the entire country. ern States, will cover the entire country with a vast network of "speaking wires".

The "long distance" company is to be commended for the liberal policy adopted by it, in educating the public to the proper appreciation of the facilities available for it and, if we are not mistaken it will date one of its quickest and longest strides forward from the display at the Lenox.—Electrical Engineer.
