A door with this device shuts out cold draughts, noise and odors, and is operated silently.

Doors so equipped can't be slammed or left open, the action is quick, firm and noiseless.

A door check is now a necessity rather than a luxury on most outside and many inside doors; its field of usefulness is constantly increasing.

The only successful door checks are those of the liquid type, and the Blount, since its introduction more than ten years ago, has been universally recognized as the leading and best Liquid Door Check on the market. It is made in six different sizes and many finishes to meet all requirements.
