are the best thing to rid your house of these dangerous pests.

## CROPS IN THE SOUTH TWO WEEKS AHEAD OF SEASON

The crops are fourteen days ahead of last year, and if present conditions continue, fall wheat in the south will average at least thirty bushels per acre, a high as thirty-five bushels in some spots. Spring wheat will average from twenty-five to thirty bushels per acre.

The above was the statement of R. Hutchins, president of the Great Southern Lumber Co., who returned yesterday from a trip through the south.

Speaking of observations, he said that in the Lethbridge district, both east and south, the fall wheat and spring wheat are practically all cut, and spring wheat harvest has commenced. The crops in these districts are several days ahead of last year, and heavier than in any previous years.

The same conditions prevail in the Nanton, Lethbridge and Spring Creek districts. In the latter, spring wheat harvesting will be general by the first of next week, and some spots which will be ready and will not be ready for about a week.

On the Plincher Creek district the crop has been the heaviest for years, and the first of the fall wheat is cut, while the spring wheat is ready by September 5.
